

## General Project Information

Agnico-Eagle Mines Limited- Canada Exploration Division (AEM) proceeds to an exploration program on Inuit Owned Land (IOL) and Crown land. The actual water licence allows to drill on land and on iced lakes, but not within 30 meters of the ordinary high water mark of water body. This amendment request is to obtain the permission to drill within the 30 meters. The drill waste should be disposed at a distance exceeding 30 meters from any water body to be sure than no sediment will go into the water. The project personnel are based at the Meadowbank Exploration camp.
