You're right, some new claims were added. I wrote a sentence on that at the point 4, but if you need precision on that just to tell me your needs.

4. LOCATION OF UNDERTAKING Does the proposed amendment change the location of the amended undertaking? X Yes ☐ No Provide the project extents and camp locations. Identify proposed changes. <i>The Ameruq (IVR) camp coordinates are indicated in this amendment. New claims are pending in the Ameruq project area and we want to include these new claims in this amendment.</i>
--

I attached a map showing the main components of the site. You'll see on the map the location of the gravel roads planned. A total of +- 9km of gravel roads are planned for the exploration activities.

For the culverts required, we don't have any design yet. A field evaluation will be required before the installation of any culverts to evaluate the needs.

Objet : 2BE-MEA1318 Amendment 2 Application

A couple of small questions related to the application for the Amendment to the 2BE-MEA1318:

Also you mention that a road up to the pits will be required. No design specifics are however provided. Could you please advise on the type of road (winter or all-weather), how long, are there water crossings or not if it would be an all weather road, any available drawings/map?

Regards,
