Good Morning,

This email is regarding the amendment request I submitted July 14th. The AANDC inspector did a visit of the the Amaruq camp site last July 22nd and she asked me to request a modification in the amendment application.

Is it possible for all of you to use this email as a supplementary request for the amendment application #3?

The request from the inspector is to modify the monitoring station name MEA-1 for MEA-2. And to add a monitoring station MEA-1 as the camp water intake volume.

I would also use this occasion to update the exploration area covered by this B water licence. We applied for new claims and signed for others and they would be managed using this water licence.
