Thank you for the document. I read it and there is one point with a small misunderstanding. The Part D, amended item 9.

In the previous licence, we had the authorisation to incinerate the toilet wastes coming from Pacto toilets. The camp will reopen this year still using the Pacto Toilets and incineration to dispose of this waste. The water toilets will be gradually installed, but we have to continue to use pacto toilets.

The other precision is for the Bionest treatment. When the toilet wastes will be sent to the Bionest, the system will treat the water and the solid will be collected in a primary tank. Its this solid coming from the primary tank, that I asked to dispose of in a "pit" and cover it with lime and soil. How do you think we could adjust the licence?

Old version:

9. The Licensee shall collect and remove all toilet wastes to the Meadowbank Mine site for disposal or, contain all toilet wastes in latrine pits or use incineration, chemical, portable or composting toilets. Latrine pits shall be located at a distance of at least thirty one (31) metres above the ordinary High Water Mark of any water body, treated with lime and covered with native material to achieve the pre-existing natural contours of the land prior to abandonment.

New version:

Amend
Item 9

The Licensee shall contain all Toilet Wastes in latrine pits or treated using chemical, portable or composting toilets. Latrine pits shall be located at a distance of at least thirty one (31) metres above the ordinary high water mark of any water body, treated with lime and covered with native material to achieve the pre-existing natural contours of the land prior to abandonment. Upon commissioning of the Wastewater Treatment System "Bionest" (WWTS), the Licensee shall direct all Toilet Wastes to the WWTS, unless otherwise approved by Board in writing.
