Re: Amendment to License NWB2MEL0507 – Type B for the Meliadine West Gold Project

Dear Ms. Beaulieu,

Attached to this letter, is an amendment application to our recently granted water license NWB2MEL0507 for the Meliadine West project. The amendment includes potential increases in personnel and level of drilling on the property in the next two years. It also addresses the potential road that we are presently permitting which has no water usage issues, but which does involve a small bridge over a seasonal stream.

Since many of the facts in the amendment are identical to that just recently submitted for in the short road application, I have referred to certain items in this amendment to the original application (e.g. map, NIRB info, etc.). I will forward a copy of the original signed application with the \$30 application fee cheque in the next few days. If you have any questions, please call me at 403-750-2560.

Yours truly,

Mark Balog
