**Re: Clarification of Area covered by NWB2MEL0304**

Dear Phyllis

Comaplex Minerals Corp. has been granted a renewal for Water License NWB2MEL0304. The original license application and subsequent renewals have always referred to the entire land package held by the Meliadine West Joint Venture as the area subject to NWB2MEL0304. This land package achieved its maximum size in 2003-2004 and the renewal granted in 2003 authorized water usage over this area. The most recent renewal application provided a more detailed map of the area where most exploration activities and most water usage is occurring. It was our understanding that the entire Meliadine West Joint Venture area would be covered by the license but the application does not make this clear. Please attach included Map 1: Meliadine West Joint Venture Land Position to our application. This represents the area within which exploration activities can occur. It represents a reduction in the area covered by the 2003 renewal application.

Please call if you have any further questions or require any further information.

Yours Truly

---
