**RE:     Geotechnical Drilling within Rankin Inlet: Land Use Permit**

Dear Mr. Wahab,

Please find attached our Application for Land Use Permit to undertake geotechnical drilling within the Hamlet of Rankin Inlet. The geotechnical drilling is explained in the attached letter to Phyllis Beaulieu of the Nunavut Water Board.

Where we propose to drill is on commissionaire's land on either side of the Meliadine River. This is to determine the structural integrity of the subsurface where the abutments for a proposed bridge across the river are to be located. The location of the bridge is shown on the attached figure 1. While not shown on the figure, we are also proposing to drill several geotechnical holes within the built-up area of Rankin Inlet, particularly in and around Itivia. Comaplex is proposing to locate a tank farm, lay down area and possibly a warehouse in the area.

Should you have any concerns or questions, please do not hesitate in calling me at 403 265 2846 or emailing me at [JWitteman@comaplex.com](mailto:JWitteman@comaplex.com).

Yours sincerely,

John Witteman  
Comaplex Minerals Corp.
