**Re: Application to Amend License 2BB-MEL0914 for an Extension of the Underground Exploration and Bulk Sample Program – Meliadine Gold Project**

Dear Ms. Beaulieu,

On July 8<sup>th</sup>, Don Carr of the Water Board's staff wrote:

*"Prior to posting public notice of the application and the public review period, the NWB requests the Licensee submit updated and revised project plans which reflect the bulk sample program as proposed."*

Since that time, Agnico-Eagle has updated 5 plans to include the extension of the underground exploration and bulk sample program. The following plans were undated:

1. Fuel Management and Spill Contingency Plan, August 2010
2. Interim Abandonment and Restoration Plan, August 2010
3. Waste Management Plan, August 2010
4. Water Management Plan, August 2010
5. Waste Rock and Ore Management Plan, August 2010

The updated plans were emailed to your attention over the past two days. The content of all were changed to some extent, some more than others, and it was not possible to make the necessary changes as an addendum to the earlier plans.

Should you have any questions or concerns with the Plans, please do not hesitate in getting in touch with me. I can be reached by phone at 403 609 1222 or email at [john.witteman@agnico-eagle.com](mailto:john.witteman@agnico-eagle.com)

Yours sincerely,

John Witteman  
Environmental Consultant to Agnico-Eagle
