Dear Manager

Comaplex Minerals Corp. is applying for a Class B permit that allows diamond drilling on its PB1 claim (F69574) near Rankin Inlet, Nunavut. The necessary forms, maps and fees are attached. In addition supporting documents (Environmental Management Plan, Spill Contingency Plan) are included on a CD.

The permit is a request to authorize diamond drill on gold targets on Claim PB1 (F69574). In addition geotechnical drilling is required at a site being considered for the installation of a bridge over the Meliadine River. This drilling would test depth to bedrock and bedrock properties at the site of the proposed bridge. In this case, drilling within the 31 meters of the high water mark of Meliadine River would be required. Details are in the attachments.

Please feel free to contact me at 403-750-2573 if you have any questions or if this submission is inadequate in any way.

Best Regards

B. Sandy Barham
Comaplex Minerals Corp.
