

Mark Balog
Chief Operating Officer
Comaplex Minerals Corporation
901 – 1015 4th Street, SW
Calgary, AB T2R 1J4

Dear Mr. Balog:

Thank you for your letter of September 8, 2008 requesting a review of the inspector's direction provided to Comaplex Minerals Corporation for contraventions to its Nunavut water licence for the Meliadine West exploration camp. I regret the delay in my reply.

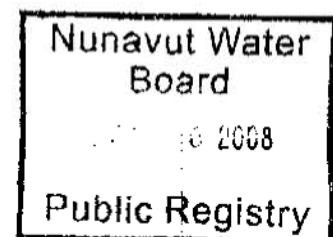

I have read carefully your letter and enclosed annex. I value the preference you have expressed to work closely with regulatory bodies, such as my department. The department's regional office in Nunavut shares this business practice. We work closely with our clients to help them comply with water licences and other regulatory instruments.

Judging from your letter, many of the directions provided by the inspector have already led to changes at the Meliadine West camp. I recommend that you share information on your progress with the inspector as these actions reflect improved compliance with the water licence in response to the letter of direction issued to your company.

You have requested my review of the direction provided to Comaplex regarding water meters. This direction relates to a requirement under the Meliadine West water licence and so cannot be modified without an amendment to the licence. You have indicated that you will be applying to the Nunavut Water Board for an amendment to your licence to allow for a contaminated soil land farm. You may wish to include in your application a request to amend conditions relating to water meters.

I thank you again for your letter. My department is committed to maintaining a high standard of environmental protection and water resource management in Nunavut. I am pleased that Comaplex shares this commitment.

Sincerely,

Chuck Strahl, P.C., M.P.

c.c.: Dionne Filiatrault, Executive Director, Nunavut Water Board
