Hi Phyllis

KIA would like to ensure Comaplex Minerals Corp. includes historical surface water sampling locations in the proposed Site Water Management Plan Addendum. A more robust water sampling program was conducted in 2008 and 2009 following the underground bulk sampling program. As this data has been very beneficial to KIA in mapping potential flows of contaminants associated with the construction project, I would like to ensure historical locations are contained in the official water management plan for the next couple years. Sampling locations I'd like included are: P1, A9, A13, A15, A38, A54, ML-R, A8-7 and Control. Sampling frequency and parameters would be similar to 2008 (monthly) from each location starting in July and finishing at Lake freeze up.

Thanks

Stephen
