RE: Comaplex Meliadine Work Plan 2009

Dear Mark:

At this time the Kivalliq Inuit Association (KIA) is satisfied with the Work Plan and supporting documents presented by Complex Minerals Corporation. Any changes to the work plan will require notification and amendment from this office.

Approval from this office does not exempt your organization from obtaining approval from all other regulatory departments. Activities such as sump construction and discharge sequences must meet applicable Nunavut Water Board guidelines. Please ensure permits and licenses are updated and valid for current work activities.

As for the request for the increase in lease area to accommodate the new wetland/discharge area, KIA will wait until the NWB has responded to Comaplex's request for an amendment to water license 2BB-MEL0709, before approval of the lease area increase.

If you have any further questions or concerns please feel free to contact the undersigned at your earliest convenience.

Sincerely

Cc: Nunavut Water Board
