Subject: Presence of a Fuel Tank in Meliadine Lake | Action update – Report 6

Agnico Eagle would like to provide an update in regards to the presence of a fuel tank in Meliadine Lake. Here is the review of the recent actions taken and the next steps that we are planning:

On August 24:

- Personnel arrived on Meliadine site today and are in isolation until their test result for COVID-19 is received.
- Once isolation is lifted, a Job Hazard Assessment will be conducted.
- The remaining equipment was transported by helicopter in preparation for the extraction of the fuel tank planned on August 25 and 26.

Next steps in the coming days:

- The drill will be moved and anchors will be installed.
- Job Hazard Assessment will be completed in the morning of August 25.
- The roll-out of the Proposed Action Plan outlined in **Report 5** will be initiated. The 4 phases of the operation are scheduled to start on Tuesday August 25 for possible completion by Wednesday August 26.

We are taking this situation seriously and we will provide further updates as more information becomes available.

Kind Regards,

Denis Vaillancourt
Exploration Manager Canada
