Ryan:

WMC International has informally notified the NWB that they will be filing a new application for the Meladine Project in the near future. WMC has questioned the NWB on Abandonment and Restoration requirements for the project. The NWB would like to ensure that there is some consistency between the advice given by the NWB to that which is given by KIA. In the near future the NWB will be revising Abandonment and Restoration Guidelines for proponents and as such it would be useful if you could advise me if KIA has a reclamation policy and/or reclamation guidelines.

Please give me a call at your earliest convenience to discuss this issue further.

Sincerely

Dionne Filiatrault
