### AFFILIATION:

TITLE: Environmental Baseline Data Collection, Meliadine Gold Project, Agnico-Eagle Mines Ltd.

### OBJECTIVES OF RESEARCH:

The purpose of the project is to collect baseline data in support of an Environmental Impact Statement being prepared for the Meliadine Gold Project. The goal is to collect sufficient information to characterize the "before development" of areas likely to be impacted by the development of the mine. Local roads will be used in Rankin Inlet to access the Itivia barge landing area with a boat and driver rented in town. An Inuit assistant will be hired to participate in sample collection. The Meliadine site is 25 northwest of Rankin Inlet. A helicopter contracted for exploration activities and located at the Meliadine site will be used to access areas to be sampled in the vicinity of the mine development. An Inuit Assistant will provide support in taking samples and at the same time learn various sampling techniques. The existing Meliadine exploration camp will be used for accommodation as will a hotel in Rankin Inlet.

### TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and by the Department of Culture, Language, Elders and Youth archeological sites terms and condition. These terms and conditions will form part of this licence.
