## ARCHEOLOGY

- 5 Reporting of Archaeological Sites: s4.4.3 and Appendix 3, s2 and s8: Will the applicant immediately report the discovery of all suspected archaeological sites to the Department of Culture, Language, Elders and Youth (GN)?

Yes

No

- 6 Code of Good Conduct for Land Users: Appendix 2: The applicant undertakes to adhere to the Code of Good Conduct at all times.

Yes

No

BARREN LAND IRON MINES CORP

I, Michael T. Zironski (name of applicant), certify that the information I have given in this application is true and correct and hereby make the above undertakings which form part of my application for a project proposal within the meaning of the Nunavut Land Claims Agreement.

Date: 03 April 2004

Signature of Applicant: 

March 25, 2004

Veronica Tattuinee  
Land Administrator

Application - Mary River Project

All applicants for a project proposal shall comply with the requirements listed below.  
The relevant sections of the plan are noted in each requirement.

GENERAL

- 1 **Environmental Protection: s2.4.9:** The applicant undertakes to prevent any new occurrences of pollution, garbage and contamination at the site of the development.

Yes

No

- 2 **Removal of Fuel Drums: s2.4.9:** The applicant undertakes to remove all drums safely from the site and dispose of the drums in a safe manner.

Yes

No

- 3 **New Site Restoration and Clean Up: s2.4.15 and Appendix 2, s1:** The applicant undertakes to clean up the site and restore the site to its natural condition to the greatest extent possible.

Yes

No

- 4 **Old Site Restoration and Clean Up: s2.4.10:** The applicant undertakes to clean up the site and restore the site to its original condition to the greatest extent possible, including any work required due to the applicant's action prior to this application.

Yes

No

HISTORIC CAMP (>30 years old) will  
be cleaned up and garbage removed.

2004

## Appendix 2 Code of Good Conduct for Land Users

1. The landscape of each camp, and other land use sites, will be restored to its original condition to the greatest degree possible. Water quality will be preserved, and no substances that will impair water quality will be dumped in water bodies. When possible, and feasible, old sites will be restored to their natural state.
2. All land users shall assist communities and government(s) in identifying and protecting archaeological sites and carving-stone sites.
3. As a general rule, low-level flights by private aircraft at less than 300 metres should not occur where they will disturb wildlife or people. Where possible, scheduled low-level flights will only take place after consultation with the appropriate communities. All land users are responsible for reporting to the appropriate authorities any illegal or questionable low-level flights.
4. All activities on the land will be conducted in such a fashion that the renewable resources of the area in question are conserved.
5. Whenever practicable, and consistent with sound procurement management, non-resident land users will follow the practice of local purchase of supplies and services.
6. Non-resident land users will establish working relationships with local communities and respect the traditional users of the land.
7. During the caribou calving, post-calving, and migrating season, land use activities should be restricted to avoid disturbing caribou, in general, and more specifically will be governed by caribou protection measures.
8. Artifacts must be left where they are found. All land users are responsible for reporting to the appropriate authorities the location of, or any removal or disturbance of, artifacts.

**APPENDIX D: CARIBOU PROTECTION MEASURES<sup>47</sup>****NBR/LUP****DIAND<sup>48</sup>**

1. (a) The Permittee shall not, without approval, conduct any activity between May 15 and July 15 within the North Baffin region.  
  
(b) A Permittee may, upon approval by the Land Use Inspector (DIAND) or Land Manager (QIA), operate within the North Baffin region beyond the May 15 deadline set out in 1(a), provided that when caribou cows are approaching the area of operation, the Permittee will implement 1 (c).  
  
(c) During the period of May 15 to July 15, the Permittee will suspend all operations, particularly blasting, overflights by aircraft at any altitude of less than 300 metres above ground level, and the use of snowmobiles and ATV's (all-terrain vehicles) outside the immediate vicinity of the camp, and all personnel will remain quietly in camp or, upon advice from the Land Use Inspector (DIAND) or Land Manager (QIA), the Permittee will remove all personnel from the site who are not required for the maintenance and protection of the camp facilities and equipment.  
  
(d) The Permittee may resume activities prior to July 15 if the caribou cows have ceased to use the area for calving or post-calving.
2. (a) During migration of caribou, the Permittee shall not locate any operation so as to block or cause substantial diversion to migrating caribou.  
  
(b) The Permittee shall cease activities that may interfere with migration, such as airborne geophysics surveys or movement of equipment, until the migrating caribou have passed.
3. The Permittee shall not, between May 15 and September 1, construct any camp, cache any fuel or conduct blasting within 10 km, or conduct any diamond drilling operation within 5 km, of any "Designated Crossing" as outlined on the map annexed to a Land Use Permit.
4. Concentrations of caribou should be avoided by low-level aircraft at all times.
