RE: NPC File No.: 148285
NIRB File No.: 16EN036

After much deliberation, the principals of Arctic Copper Corp. have decided to withdraw the Company's application to the Nunavut Planning Commission, the Nunavut Water Board and Land Administration at INAC. The Company is sensitive to the concerns pointed out by the NPC and will address those concerns in a new application for a new program in time for the 2017 field season. This will give the Company time to assess the impact of the new Nunavut Land Use Plan, which we believe will be enacted later this summer.

Regards,

Donald Penner, P.Geo.
President & Director
Arctic Copper Corp
