To: dfpenner@pennergeological.com

Cc: Licensing Department <licensing@nwb-oen.ca>, Sean Joseph <sean.joseph@nwb-oen.ca>

The NWB has conducted a preliminary review of the above-referenced file, which determined that the following must be addressed before the application could proceed to the next stage of the licensing process, once the NPC's and/or the NIRB's decisions are received:

1. Confirmation of the water use required for the file in Block 13 of the Water Licence Application Form and in Item 29 of the Exploration/Remote Camp Supplementary Questionnaire (Questionnaire). Item 29 of the Questionnaire states that the total water use requested is 65.5 m³/day for drilling and no water use for other purposes while some subsections of Block 13 of the Water Licence Application form include conflicting information related to water use required;
2. Inclusion of the signature of the Applicant's representative under Block 28 of the Water Licence Application Form;
3. Inclusion in the Spill Contingency Plan of a site map depicting spill kits, nearby water bodies, fuel caches and other relevant information; a cover page, and table of contents; and
4. Inclusion in the Abandonment and Restoration Plan of site map depicting project camp and other infrastructure associated with the site

Regards
