Good morning,

Please find attached ATHA Energy's response to CIRNAC comments on the amendment application for type B Water Licence No: 2BE-ANG2227.

For CIRNAC's information, the NWB met with the Licensee on September 17, 2026 regarding the submission of the updated Environmental Management Plan to include water quality monitoring requirements. Given that trail construction has been postponed until next year, two options were discussed:

1. Submitting the updated plan prior to the issuance of the amendment renewal.
2. Submitting the plan 60 days before construction begins, as originally proposed.

Following the meeting, the Licensee confirmed they would like to proceed with Option 2: proceeding with the amendment renewal as is and submitting the updated Environmental Management Plan 60 days prior to construction.

The Nunavut Water Board requests CIRNAC provide a response by **October 6, 2026.**

Regards,

Robert Hunter
Licensing Administrator
