Subject: Amendment to Strongbow's Spill Response Plan

Dear Phyllis,

I have some questions regarding the recommended changes to our spill response plan. They refer to location of fuel storage and spill response resources with respect to the proposed exploration camps for the Canoe Lake, Anialik River, and Tree River projects. At this point in time, the layout of the camps have not been drafted and it is likely that they will not be determined until closer to the commencement of each program and with further examination of ground conditions. If a draft is still required, we can provide a generic layout of how we would like the camps to be set up and the proposed fuel and spill response resource storage locations. We will of course submit the final layout once the camps have been completely built. Please advise if this will be sufficient for now. The revised spill response plan for each program will follow shortly via email.

Thanks for your attention and hope to hear from you soon.
