Subject: RE: Camp locations

Hello Jim:

Please find attached a draft version of the Ashton Nunavut Spill Response Plan. If you have any comments please let me know. The lat/long coordinates for the camps/proposed camps are listed on the Response Plan.

I am completing the list of work on our permits. The report will be until the end of 2002.

Regards,

Dave Willis - Ashton

Good morning, David:

At present, I'm completing the preliminary technical review on your application. Other than those issues previously discussed, all looks very positive. I was wondering, however, if you could provide the lats and longs for the camps? As we discussed yesterday, most folks up here use lats/longs, and may be less familiar with UTM's. As well, the bulk of the maps that they would have readily accessible in the communities are most likely are set up in lat/longs.

Thanks for your efforts. If I receive the annual reports and the updated Spill Plan in the next couple of days, I should be able to complete the preliminary review by Thursday afternoon. As I indicated before, if you would like me to take a quick look at the draft plan, that's no problem. Just send it, marked draft, and I'll get it right back to you.

Have a good morning, and we'll talk in the next couple of days.

Best regards,

Jim Wall
