---

Mr. Lunn,

Thank you for your note.

I will review the enclosed documents and then review ( IF POSSIBLE) the submitted A&R plan for the camp and the expired Water License.

Once I have reviewed these I will be in a better position to provide you some input. I will do my best to address this today prior to flying out on Inspections.

Respectfully,

Andrew Keim

Hi Andrew,

Kris Raffle has asked me to get in touch with you in regards to the site remediation of Burnstone's Erickson Lake Camp on Baffin Island.

I have some people digging up all of the contaminated soil on site. The airstrip at the camp has been heavily damaged from washouts over the past couple of years and is unusable. Our current plans, if acceptable to you, is to dig up all of the contaminated soil into sealable drums and leave on site until the snow flies this winter. At which point, we would come in with a Twin Otter on skis and haul the soil and remaining fuel drums from site to Igloolik for transportation south. It is likely, at the same time, that we would remove the camp in its entirety to Igloolik.

Is this plan acceptable to you?

Cheers,

Casey Lunn, ASCT

Hi Andrew,

I have attached a copy of the inspection report and my response to the INAC inspector detailing our cleanup plan (pretty general). I don't expect there to be a huge amount of spilled fuel since there really wasn't supposed to be any fuel left in camp. I suspect we may be dealing with a single leaking drum (I hope), plus as much garbage/general cleanup as can be accomplished during the time on site.

I will forward Al's budget estimate as well.

Thanks for your help,  
Kris

Subject: FW: Baffin Camp

Hi Al,

I'm trying to arrange a short fuel spill/garbage cleanup at the Burnstone Baffin Is. Camp (old De Beers Erickson Lake camp). It's about an 1-1.5hr flight across the basin NE from Igloolik.

Last year the landuse inspectors noted a small fuel spill from a leaking drums on the esker strip and some garbage that needed cleaning up around camp. Burnstone had to commit to cleanup this year but they don't want to do an exploration program to coincide. Hence the short mission.

Burnstone has \$43,000 credit left with APEX so we want to get this done as cheaply as possible and/or without using all of the money. Can you arrange to handle this?

Give me a shout or send an email,  
Thanks,  
Kris

Yah, getting Al to do it would be awesome.  
Don't want to spend all the money if possible.

Hi Dean,

Sounds like they're up for cleanup only.

Should we put this on to Al Vosberg and see if he can come up with a scenario via Hayes Camp. Maybe someone is working out of Hall Beach this year?

Kris

Thank you

Can you please provide an estimate of cost to clean the small spill Dean was referring to and when is best to go up with the Government guys so we can find funds for that.

Dean might want to see if any funds is still with Apex on the old budget (left over from the prepaid of FT 2years ago) or from the sale of fuel last year.

Thanks

Subject: FW: N2007C0014 Extension Approval

Hi Eugene,

Please find attached for your records, notification of approval for a 1 year extension to the Baffin land use permit. Original are on their way to your office. In an effort to expedite the renewal I did not address the name change to Burnstone. Some additional correspondence from NIRB related to the approval to follow.

Regards,  
Kris
