## Baffin Island RCD 064 – SPILL CONTINGENCY PLAN

### Site Map

### Type and maximum amount of contaminants:

3000 litres of grey water in sump  
 1 x 2 metre square of sewage in pit privy  
 70 drums of jet fuel  
 20 drums of diesel fuel  
 5 100 lb. propane cylinders  
 2 100 lb. oxygen cylinders

Prepared by: C. Redhead	Approved By: M. Pickard	Date Issued: 28 July 2005
Form No.: RCD 064	Revision No: 0	Date of Revision:

Reporting a spill:

**1. What to Report – External Reporting to Regulatory Agencies**

**Spill Reporting Thresholds**

Jurisdiction	Compressed Gas	Flammable Liquids	Corrosive Substances	Environmentally Hazardous Substances	Dangerous Wastes	Other Contaminants
Nunavut	***	100 L	5 L/ 5 kg	1 L/ 1 kg	5 L/5 kg	100 L/ 100 kg

All radioactive spills must be immediately reported, however small.

\*\*\* A spill is "any discharge into the natural environment that is abnormal in quality or quantity in light of all the circumstances of the discharge". ALL spills that are discharged to the environment are to be reported.

- Note that regulatory authorities must be notified **forthwith**, upon discovery of a reportable spill, as required by legislation.
- If the Responsible Person is unsure about the "reportability" of a spill, the Environmental Management Representative is to be contacted for direction. If you are unable to reach the Environmental Management Representative please err on the side of caution and report the incident.

A sufficiently trained Responsible Person that determines that external reporting is required will provide required information to regulatory authorities. This information may include:

☐ Date and time of spill \_\_\_\_\_

☐ Location of spill \_\_\_\_\_

☐ Name and phone number of a contact person close to the location of spill  
\_\_\_\_\_

Prepared by: C. Redhead	Approved By: M. Pickard	Date Issued: 28 July 2005
Form No.: RCD 064	Revision No: 0	Date of Revision:

Baffin Island  
**RCD 064 – SPILL CONTINGENCY PLAN**

☐ Type of contaminant spilled and quantity spilled

\_\_\_\_\_

☐ Cause of spill

\_\_\_\_\_  
\_\_\_\_\_

☐ Whether spill is continuing or has stopped

\_\_\_\_\_

☐ Description of existing/planned containment measures

\_\_\_\_\_  
\_\_\_\_\_

☐ Actions taken to contain, recover, clean up and dispose of spilled contaminant

\_\_\_\_\_  
\_\_\_\_\_

☐ Name and phone number of person reporting spill

\_\_\_\_\_  
\_\_\_\_\_

☐ Name of owner or person in charge, management or control of contaminants at time of spill

\_\_\_\_\_

**2. What to Report – Internal Reporting to De Beers Canada Authorities**

☐ Report completed through Incident/Accident and Nonconformance reporting system (required as soon as possible, as per DBC System Level Procedure PROC 4.5.2 SYS)

☐ Report to Environmental Management Representative if MAJOR spill

### 3. Where to report – Regulatory Reporting

#### TELEPHONE NUMBERS

Spill Reporting (call collect)	1-867-920-8130
Mine Site and Exploration Site Accidents	1-867-873-0123
DIAND Inspector (Iqaluit)	1-867-979-6445
DFO (Iqaluit)	1-867-979-8039
Environment Canada (Iqaluit)	1-867-475-4644
Environment Canada 24 hour pager service	1-867-920-5232
R.C.M.P. (Iqaluit)	1-867-979-0123

#### Spill Clean up and Disposal:

All contaminated material will be removed to containers which will be flown for disposal at an approved waste disposal facility.

**RCD 064 – SPILL CONTINGENCY PLAN**

Training:

All personnel at site will be trained in spill response entitled De Beers Canada Inc. - Exploration Division Spill Prevention and Cleanup programme.

This programme includes training in:

- types of substances that make up a spill,
- a definition of a spill,
- preventing a spill,
- clean up of a spill,
- and reporting a spill

Response and clean-up:

Baffin Island project maintains 8 200 litre spill kits and 3 small spill kits.

The location of the spill kits is noted on the Site Map above.

There is also a Honda pump for pumping grey water further away from the lake.
