

Pure Diamond Exploration Inc.

Abandonment and Restoration Plan

Upon completion of the land use operation and exploration of the Baffin Island Project, the following steps and procedures will be implemented to allow proper abandonment and reclamation of the area. This plan will be updated on a yearly basis and/or when changes to the exploration plan warrant it.

1. Grey water Sumps will be monitored and if required will be back filled and recontoured.
2. All remaining garbage will be incinerated in an incinerator.
3. All wood (tent floors, frames etc.) will be removed from the site to an approved landfill site or will be burned along with all other combustible material in an incinerator or equivalent. Any excess refuse will be removed from site.
4. All camp materials, fuel drums, and drilling equipment will be removed from the site.
5. All drilling sumps will be backfilled, burying the unused cutting and drill waters.
6. Each drill site will be inspected prior to departure to make sure all garbage has been removed and any disturbed ground will be reclaimed.

The above procedures have been put in place to ensure that once Pure Diamonds Exploration Inc. is off site, there has been minimal impact to the environment.
