**RE: 2BE-BAR, Indicator Minerals Inc. Barrow Project, Kugaaruk, Nunavut**

I have reviewed that comments in your letter dated May 11, 2007 regarding the Barrow Project application submitted to the Nunavut Water Board (NWB). I have revised the Environmental Procedures Plan (EPP), Spill Contingency Plan (SCP) and the Abandonment and Restoration Plan (ARP) that had been submitted with the application. I will address each comment in your letter according to the same format.

**Waste Treatment**

- a. Indicator Minerals Inc. will submit a signed copy of the agreement to the NWB prior to the initiation of the drilling program.
- b. Please see EPP page 9, and ARP.
- c. Please see SCP.
- d. To date Indicator Minerals Inc. has not determined drill site locations. As the project is in close proximity to the community of Kugaaruk the location of fuel caches if required will be determined by the location of the drill sites. Notification will be made prior to establishing any fuel caches. Please see EPP page 8, 10, and SCP page 4.
- e. Please see SCP page 5.
- f. Please see SCP Appendix 2 page 14.
- g. Once drilling locations and potential fuel cache locations have been determined a map will be submitted.
- h. Please see SCP page 6.
- i. Please see SCP page 4.
- j. Please see SCP page 10 and EPP page 7.
- k. Please see ARP.
- l. Please see ARP.

Thank you for your comments regarding the Barrow Project application, please do not hesitate to contact me if you have any questions or comments regarding the revisions in the Environmental Procedures Plan, Spill Contingency Plan or Abandonment and Restoration Plan.

Sincerely,

Johanna Tuck
