 ☐ Cancellation

LICENCE NO:

(for NWB use only)

1. NAME AND MAILING ADDRESS OF APPLICANT/LICENSEE Zoran Madon Exploration Manager Majescor Resources Inc. 103-5420 Canotek Road Ottawa, ON K1J 1E9 Phone: (613) 241-5333 Fax: (613) 241-8632 e-mail: zoran@majescor.com	2. ADDRESS OF CORPORATE OFFICE IN CANADA (if applicable) <u>Same as 1</u> Phone: _____ Fax: _____ e-mail: _____
3. LOCATION OF UNDERTAKING (describe and attach a topographical map, indicating the main components of the Undertaking) Majescor Resources Inc has 132 active mining claims centered ~120km southwest of the community of Baker Lake (see map attached). Localized sampling, prospecting, mapping, spectrometer surveys and ground geophysics will be conducted around high interest geophysical targets with possible airborne geophysics follow up on targets of the best interest. Drilling of selected geophysical targets may follow in subsequent field seasons based on the results of data collected from previous activities. Refer to attached Map – for camp location, fuel caches and water sources Refer to attached map for drill targets Latitude: <u>64° 06' 40" N</u> Longitude: <u>97° 52' 30" E</u> NTS Map No. <u>66A/04</u> Scale: _____	
4. DESCRIPTION OF UNDERTAKING (attach plans and drawings) In support of exploration sampling activities, a short-term, base camp was constructed. The camp consists of 10 wooden framed structures to house up to 13 personnel, for sleeping and to serve as kitchen and office tents. These were set up on Princess Mary Lake, a Class B Permit has been applied for and received from INAC in accordance with the Territorial Land-Use Regulations (Permit #N2008C0029). Water will be used for cooking and bathing. Water use for 1 small crew will amount to approximately 1.0 m3 per day. Garbage and disposable waste materials will be regularly transported out for proper disposal in the closest authorised community landfill; food scraps and grease will not be deposited in greywater sumps. If water is pumped from a lake or river for cooking or bathing (temporary shower), the hose intake will be screened to prevent any entrainment of fish. Use of bottled or boxed drinks will minimise the requirement for drinking water;	

such supplies are typically carried in samplers' daypacks.

The base camp structures and all related materials will be removed prior to the termination of the Land Use Permit (#N2008C0029 - July 10, 2010). Any greywater pits (cooking water or wash-water outfalls) will be in depressions at least 31 m from any waterbody, and any latrine pits dug will be similarly located at least 31 m from any waterbody, and will be backfilled with shovels and treated with quick lime prior to camp closure.

5. TYPE OF PRIMARY UNDERTAKING (A supplementary questionnaire must be submitted with the application for undertakings listed in "**bold**")

- | | |
|---|---|
| <input type="checkbox"/> Industrial | <input type="checkbox"/> Agricultural |
| <input checked="" type="checkbox"/> Mining and Milling (includes exploration/drilling) | <input type="checkbox"/> Conservation |
| <input type="checkbox"/> Municipal (includes camps/lodges) | <input type="checkbox"/> Recreational |
| <input type="checkbox"/> Power | <input type="checkbox"/> Miscellaneous (describe below): |

See Schedule II of *Northwest Territories Waters Regulations* for Description of Undertakings

6. WATER USE

- | | |
|---|---|
| <input checked="" type="checkbox"/> To obtain water | <input type="checkbox"/> Flood control |
| <input type="checkbox"/> To cross a watercourse | <input type="checkbox"/> To divert a watercourse |
| <input type="checkbox"/> To modify the bed or bank of a watercourse | <input type="checkbox"/> To alter the flow of , or store, water |
| <input type="checkbox"/> Other (describe): | |

7. QUANTITY OF WATER INVOLVED (cubic metres per day including both quantity to be used and quality to be returned to source)

- Water use** ☒ 100m³/day or less
☐ Greater than 100m³/day; if greater, indicate quantities to be used for each purpose (camp, drilling, etc.)

1.0 cubic meters/day for fly camps

20 cubic meters/day for future drilling activities which may take place in year 2 of the program

Water returned to source

n/a m³/day

8. WASTE (for each type of waste describe: composition, quantity (cubic metres per day), methods of treatment and disposal, etc.)

- | | |
|---|---|
| <input checked="" type="checkbox"/> Sewage | <input type="checkbox"/> Waste oil |
| <input checked="" type="checkbox"/> Solid Waste | <input checked="" type="checkbox"/> Greywater |
| <input type="checkbox"/> Hazardous | <input type="checkbox"/> Sludges |
| <input checked="" type="checkbox"/> Bulky Items/Scrap Metal | <input type="checkbox"/> Other describe): |

Sewage will be disposed of in pit privies

Grey water will be disposed of in a gravel lined sump

Bulky Items/Scrap Metal and solid waste will be back hauled to the nearest authorized landfill

9. OTHER PERSONS OR PROPERTIES AFFECTED BY THIS UNDERTAKING (give name, mailing address and location; attach if necessary) - see attached

Land Use Permit

DIAND

☒ Yes ☐ No N2008C0029

Regional Inuit Association

☒ Yes ☐ No If no, date expected _____

Commissioner

☐ Yes ☐ No If no, date expected _____

10. PREDICTED ENVIRONMENTAL IMPACTS OF UNDERTAKING AND PROPOSED MITIGATION MEASURES (direct, indirect, cumulative impacts, etc.)see attached

NIRB Screening

☒ Yes ☐ No with DIAND Application N2008C0029

11. INUIT WATER RIGHTS

Will the project or activity substantially affect the quality, quantity, or flow of water flowing through Inuit Owned Lands and the rights of Inuit under Article 20 of the Nunavut Land Claims Agreement?

No

If yes, has the applicant entered into an agreement with the Designated Inuit organization to pay compensation for any loss or damage that may be caused by the alteration. If no compensation agreement has been made, how will compensation be determined?

12. CONTRACTORS AND SUB-CONTRACTORS (name, address and functions)
