Subject: Indicator Mineral Inc. File No. 2BE-BOR

I went on local radio and announced that if there is any concern from the community for this project.

People who hunted in that area for fish has noticed that there are old barrels that were left behind, and they do not want to see any barrels left behind if this project is going to go ahead and that NWB inspect after the project is done to make sure any barrels or garbage are not left behind, that area is used for trail between Arctic Bay and Pond Inlet during winter and spring, and during summer that area is used for hunting caribou by ATV (All Terrain Vehicles).

So the concern is: No barrels left behind, no garbage left behind, and that NWB send someone to inspect that area to make sure anything is not left behind.
