Hi Mike,

Thanks so much for the reports. I'll address them in separate e-mails for the Board's benefit.

With respect to 2BE-CAN0608:

I acknowledge the report that was submitted to show the remediation work carried out in 2014. Thank you for North Arrow's willingness to clean up the legacy debris and ensuring that this area is now remediated. I am satisfied that the Abandonment and Reclamation requirements of the licence have been met and that no further inspection is required for licence cancellation.

Please copy the above-mentioned report to the NWB so that it is held on the public registry.

As an existing cancellation application is on file with the NWB, the licence may be cancelled with the NWB is satisfied that all administrative requirements have been met.

Best regards,

*Eva Paul*

Water Resources Officer | Agent des ressources en eau

Hope you're well and that you had a good field season! We did some work up in the Lac de Gras area in August and managed to get out to two old sites that you had visited last year – Canoe Lake (2BE-CAN0608) and Silvertip (2BE-SIL0709). Attached please find summaries of our clean-up efforts at both locations. Each report includes a table with the locations we visited and removed debris (with coordinates), also included are before and after pictures of all items you noted in your original reports that were to be removed. Once you've had a look through the reports and are satisfied, we would like to move forward with the cancellation of these two licenses. We submitted cancellation applications for both of these licenses back in August of last year, and I seem to recall you mentioning that we would not have to re-submit these, can you please confirm this, thanks!

Please don't hesitate to contact me at your earliest convenience if you have any questions or comments.

Cheers,

Mike
