Re: 5530 Nunavut Inc. – 2017 Annual Report 2BE-CBP1722 Committee Bay Project.

Dear Mr. Baines,

In the Technical Review of the 2017 Annual Report for the Committee Bay Property; Water Licence No. 2BE-CBP1722 letter dated December 18, 2018, the NWB requested revisions of the Spill Prevention and Response and Abandonment and Restoration Plans be submitted.

This letter is to notify the NWB that no exploration work was completed on the Committee Bay Property in 2017 and therefore the Management Plans were not updated. At a minimum of 30 days prior to field activities being conducted on the Property, these Management Plans will be updated to include coordinates and a topography map with the proposed location of the camp, related water bodies, fuel cache location, and the spill kit locations, if any. The Committee Bay Property Abandonment and Restoration Plan will also be renamed to the Committee Bay Property Closure and Restoration Plan.

Best Regards,

Fabio Capponi
President
