

PART 1 FORM PROJECT PROPOSAL INFORMATION REQUIREMENTS

For more information about the Nunavut Impact Review Board (NIRB) please visit our web site http://nirb.nunavut.ca/ or to access NIRB documents, project screenings, and project reviews please visit the Nunavut Impact Review Board ftp site http://ftp.nunavut.ca/nirb.

IMPORTANT!

Please be advised that your application will not be processed until the Sections 1 - 9 are completed in their entirety, in both English and Inuktitut (+ Inuinnaqtun, if in the Kitikmeot).

SECTION 1: APPLICANT INFORMATION					
1. P	Project Name CHIDLIAK PROJECT				
2.	Applicant's full name and mailing address:				
	Shirley Standafer-Pfister	Phone	e:	(867) 444-1239	
	(on behalf of Peregrine Diamonds Ltd.)	Fax:	-	N/A	
	Box 662 – Yellowknife, NT X1A 2N5	Emai	l: _	ssp_yk@hotmail.com	
3.	Primary contact's full name and mailing address	s:			
	Peter Holmes, Peregrine			(604) 408-8880	
	Diamonds Ltd.	Phone	-	` ,	
	201 - 1250 Homer Street Vancouver, BC V6B 1C6	Fax: Emai	-	(604) 408-8881 peter@pdiam.com	
	vancouver, be vob 160		٠ -	peter @ param.com	
(Regional Inuit Association (RIA) Nunavut Water Board (NWB) Nunavut Planning Commission (NPC) Indian and Northern Affairs Canada (INAC)	Er Go	viro	dian Launch Safety (CLS) onment Canada (EC) rnment of Nunavut (GN) rtment of National Defence (DND)	
	Department of Fisheries and Oceans (DFO)		amle	` ,	
	Community Government & Services (CG&S)		Parks Canada (PC)		
	Nunavut Research Institute (NRI)			dian Wildlife Service (CWS)	
				(please specify):	
	Department of Culture, Language, Elders,			ded Hours' Permit from Nunavut	
	and Youth (CLEY)		abou	ur Standards.	
2.	List the <u>active</u> permits, licences, or other author and their expiry date(s): This is a new property: There are no previous perm			ed to the project proposal,	

3.	An INAC Class A land-use permit and a QIA Land Licence I will be applied for, as well as an							
	NWB Type B water licence.							
4.	. Has this project or <u>any components of this project</u> been previously screened or reviewed by NIRB?							
	If YES, indicate the previous project name and NIRB File No.							
	• • •							
	SECTION 3: PROJE	CT PR	OPO	SAL DESCRIPTION				
	SECTION 3: PROJECT PROPOSAL DESCRIPTION							
1.	Indicate the type of project proposal (c (See Appendix A for Project Type Defin		that a	ipply) ^{(',-/} :				
•	1 All-Weather Road/Access Trail		9	Site Cleanup/Remediation				
2	2 Winter Road/ Winter Trail		10	Oil and Natural Gas Exploration/Activities

Chidliak Project is located on the South Baffin mainland, bounded by Cumberland Sound at the north and Frobisher Bay at the south. Iqaluit is approximately 85km from the southwest corner of the property and Pangnirtung is approximately 133km from the northeast corner of the property. There are no parks close by.							
6c. Discuss the history of the site if it has been used for any project activities in the past.							
Peregrine Diamonds Ltd. acquired the federal Prospecting Permits on 01 February 2007. There has been no previous work by Peregrine, other than prospecting and initial sampling associated with identifying the general area of interest.							
6d. Indicate if there are any known archaeological/palaeontological historical sites in the area.							
There are NO known archaeological/palaeontological sites on the property. However, a request for data for the respective 11 mapsheets (in 26A and 26B) – for purposes of site avoidance – currently is being requested from the Archaeology Division, Dept. of Culture, Language, Elders and Youth (CLEY). Data received will be incorporated into planning, in advance of fieldwork.

Please note that additional location information may be required in a subsequent Project Specific Information Requirement (PSIR) submission. This may take the form of a digital Geographic Information Systems (GIS) file.

SECTION 4: NON-TECHNICAL PROJECT PROPOSAL DESCRIPTION

Please include a non-technical description of the project proposal, no more than 500 words, in English and Inuktitut (+Inuinnaqtun, if in the Kitikmeot). The project description should outline the following:

• The project activities, their necessity and duration;

- Method of transportation;
- Any structures that will be erected (permanent/ temporary);
- Alternatives considered; and
- Long-term developments, the projected outcome of the development for the area and its timeline.

<u>IMPORTANT:</u> IF THE PROPOSED ACTIVITIES REQUIRE SUBMISSION OF A NIRB PART 2 PSIR FORM, PLEASE COMPLETE SECTION 8 ONLY, OTHERWISE CONTINUE ON WITH SECTION 5.

SECTION 5: MATERIAL USE								
1. List equipment to be used (including drills, pumps, aircraft, vehicles, etc.):								
Equipment type and nu	Size – dimensions			Proposed use				
				·				
2a. Detail fuel and hazardous material use:								
		nber of Total Amount						
Fuel	Fuel Contant C		of Fuel (in Litres)	Proposed Storage Methods				
Diesel	01 001	itallicis						
Gasoline								
Aviation fuel								
Propane								
Other								
Hazardous Materials and Chemicals			Total Amount of Hazardous Materials and Chemicals (in Litres)					
2b. Describe the proposed Spill Prevention Plan.								
3a. Detail the anticipated daily water consumption rates								
Daily amount (m³) Proposed water retrieval methods				Proposed water retrieval location				
	I			I				

3b. Have you applied for a water License with the Nunavut Water Board?									
□ Y	ES		NO						
If yes, what class of licence?									
□ Class A Water Licence									
☐ Class B Water Licence									
SECTION 6: WASTE DISPOSAL AND TREATMENT METHODS									
1. List the types of waste associated with the proposed project activities:									
Type of waste	Projected amount generated	Method of Disposal	Additional treatment procedures						
Sewage (human waste)									
Greywater									
Combustible wastes									
Non-Combustible wastes									
Overburden (organic soil,									
waste material, tailings) Hazardous waste									
Other:									
SECTION 7:	COMMUNITY INVOLV	VEMENT & REGIONAL	L BENEFITS						
SECTION 7: COMMUNITY INVOLVEMENT & REGIONAL BENEFITS 1. List the community representatives that have been contacted and provide the minutes of the meetings if available:									
Community	Name	Organization	Date Contacted						
	SECTION 8: GENERAL QUESTIONS								
Will you be disturbing any known archaeological sites?									
□ Y	'ES		X <u>NO</u>						

Please sign and date your application:

APPENDIX A Project Type Definitions

- **Access Trail**: A project proposal with the objective of providing vehicular access to an area of interest involving minimal alteration to the terrain.
- **Advanced Exploration:** A project proposal with the objective of identifying size, grade, and physical characteristics of a mineral occurrence and to assess the economic and technical feasibility of developing the mineral deposit into a producing mine
- **All-Weather Road:** A project proposal with the objective of road construction for use in all seasons.
- **Bulk Sampling:** A project proposal with the objective of extracting of large samples of mineralized material involving hundreds to thousands of tonnes. Samples are selected as representative of the potential mineral deposit being sampled. May involve crushing/milling (on small-scale)
- **Harvesting activities:** A project proposal with the objective of harvesting animals, marine mammals and/or fish from their natural habitats by means of hunting or trapping for traditional and commercial use.
- **Marine Based Activities:** Any activity occurring in the marine environment, such as vessel use associated with land-based activities or disposal at sea.
 - *Please note that normal community re-supply or individual ship movements not associated with land-based project proposals shall not be screened by NIRB (Section 12.12.2 of NLCA).
- **Mine Development:** A project proposal with the objective of extracting broken rock with mineralization of sufficient grade and tonnage to sustain commercial mining operations (ore). Mining a body of ore can be achieved by either open pit and/or underground development. Mine development may involve milling. Milling involves treatment of the extracted ore through a combination of mechanical and chemical processes to selectively recover the valuable mineral.
- **Mineral Exploration:** A project proposal with the objective of exploring an area to find geological anomalies. It involves site reconnaissance (ground and/or air) to locate broad and fiscal mineral deposits.
- **Offshore Infrastructure:** A project proposal with the objective of building off loading facilities constructed off the shoreline and connected to the mainland of the marine or freshwater environment. Examples include a jetty, dock, or port facility.
- **Oil and Gas Exploration/Activities:** A project proposal that includes 1) exploration, such as seismic or geological mapping, 2) drilling of oil and gas wells, 3) construction and operation of a pipeline, a gas processing plant or any oil and gas facility within Nunavut.
- **Pits and Quarries:** A project proposal with the objective of pitting, which involves the extraction of granular material (i.e. sands and gravels) and quarrying, which involves the removal of consolidated rock (i.e. bedrock, frozen soil).
- **Scientific Research:** A project proposal with the objective of implementing a series of site activities comprised of observation of phenomena, measurement and collection of data necessary for scientific investigation in designated areas within a limited time period.
- **Seismic Survey:** A project proposal with the objective of conducting a survey to map the depths and contours of rock strata by timing the reflections of sound waves released from the surface. Survey site locations may be offshore (not within 12 nautical miles of any coast), near shore, and extended onshore.
- **Site Cleanups:** A project proposal with the objective of site cleanups (includes DEW line site cleanups), which focuses on the remediation of chemically contaminated soils, stabilization of landfills and dumps, demolition/disposal of infrastructure and debris and monitoring after cleanup is completed.

- **Tourism Activity:** A project proposal with the objective of conducting travel predominantly for recreational, sport or leisure purposes within a designated area and limited time period.
- **Winter Road:** A project proposal with the objective of building a road for winter use by leveling and compacting surface snow and ice. Winter road is removed at end of season.
- **Winter Trail:** A project proposal with the objective of building a trail for winter use by a single pass of a tracked vehicle using a blade, if necessary.
