Subject: RE: 2BE-CHI0803 Spill Plan and AR Plan-Reply

Greetings, Peter and Phyllis,

As stated in the application, the Spill Plan and A&R Plan for both Nanuq and Chidliak Projects will be updated when the camps are occupied. This has not yet occurred, and thus it is not yet possible to produce the maps with specific site information, spill-kit co-ordinates/contents, etc. Adjustment to reflect any changes to drill additives and anticipated fuel volumes awaits finalisation by the respective project managers. For Nanuq, a Waste Management Strategy has been requested, and this also is in preparation.

Peregrine has arranged for a Waste Generator Number with Robert Eno of GN-DOE, and arrangements also are under way with respect to Waste Receivers in the respective project areas.

With respect, there is no urgency as the sites are not yet occupied and work in is progress. If you feel extensions are necessary for provision of the information, please advise.

Best regards,

-- ssp

Hello Shirley,
I got this message on my blackberry. Please confirm that you will be dealing with this item.

Thanks,
Peter

Good afternoon - your reminder that addendums are required to the spill plan and AR plan for the above mentioned water license.
Regards
