RE: NWB Licence No. 2BE-CNA0608 (previously NWB2CNA)

Dear Ms. Westcott:

Please find attached Licence No. **2BE-CNA0608** issued to Stornoway Diamond Corporation by the Nunavut Water Board pursuant to its authority under Article 13 of the *Agreement between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*. The terms and conditions of the attached Licence related to water use and waste disposal are an integral part of this approval.

Sincerely,

Original signed by:

Philippe di Pizzo
Executive Director

NUNAVUT WATER BOARD
NUNAVUT IMALIRIYIN KATIMAYINGI

DECISION

LICENCE NUMBER: 2BE-CNA0608 -Type “B”

This is the decision of the Nunavut Water Board (NWB) with respect to an application for a Licence dated July 21st, 2005 made by:

STORNOWAY DIAMOND CORPORATION

to allow for the use of water and disposal of waste during camp operations, and exploration drilling at camp locations located within the Kitikmeot and Kivalliq Regions, Nunavut (with camp locations listed in Table 1).

DECISION

After having been satisfied that the application was exempt from the requirement for screening by the Nunavut Impact Review Board in accordance with Schedule 12.1, Paragraph 5 of the *Nunavut Land Claim Agreement* (NLCA), the NWB decided that the application could proceed through the regulatory process. In accordance with S.55.1 of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* (NWSRTA) and Article 13 of the *NLCA*, public notice of the application was given and interested persons were invited to make representations to the NWB.

After reviewing the submission of the Applicant and representations made by interested persons, the NWB, having given due regard to the facts and circumstances, the merits of the submissions made to it and to the purpose, scope and intent of the *NLCA* and of the *NWSRTA*, decided to waive the requirement to hold a public hearing and furthermore to delegate its authority to approve the application to the Chief Administrative Officer pursuant to S. 13.7.5 of the *NLCA* and S. 49(a) of the *NWSRTA* and determined that:

Licence Number 2BE-CNA0608 -Type “B” be issued subject to the terms and conditions contained therein.

SIGNED this 21st day of February 2005 at Gjoa Haven, NU.

I. INTRODUCTION

On July 21st, 2005, a water licence application was filed with the Nunavut Water Board by Stornoway Diamond Corporation for water use and waste disposal activities, classified as Mining and Milling, during camp operations and drilling operations at camp locations set within the Kitikmeot and Kivalliq Regions, Nunavut (camps locations listed in Table 1). After having been satisfied that the application was exempt from the requirement for screening by the Nunavut Impact Review Board in accordance with Schedule 12.1, Paragraph 5 of the *Nunavut Land Claim Agreement (NLCA)*, the NWB decided that the application could proceed through the regulatory process.

Table 1 – Proposed Camp Locations for Licence 2BE-CNA0608

CAMP	LATITUDE	LONGITUDE
A	103.61°	65.56°
B	93.91°	65.07°
C	95.18°	60.95°
D	96.33°	63.79°
E	106.06°	64.97°

In accordance with S.55.1 of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act (NWNSRTA)* and Article 13 of the *NLCA*, public notice of the application was given and interested persons were invited to make representations to the NWB. No public concerns were expressed, and after reviewing the submission of the Applicant and representations made by interested persons, the NWB, having given due regard to the facts and circumstances, the merits of the submissions made to it and to the purpose, scope and intent of the *NLCA* and of the *NWNSRTA*, decided to waive the requirement to hold a public hearing and furthermore to delegate its authority to approve the application to the Chief Administrative Officer pursuant to S.13.7.5 of the *NLCA* and S.49(a) of the *NWNSRTA*.

II. GENERAL CONSIDERATIONS

A. Term of the Licence

In accordance with the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* S. 45, the NWB may issue a licence for a term not exceeding twenty-five years. The NWB believes a term of approximately two (2) years, as applied for, is appropriate. The licence term will allow the Licensee to properly carry out the terms and conditions of the licence and will ensure that sufficient time is given to permit the Licensee to develop, submit and implement the plans required under the licence to the satisfaction of the NWB.

B. Annual Report

The requirements imposed on the Licensee in this licence are for the purpose of ensuring that the NWB has an accurate annual update of water use and depositions of waste during a calendar year. This information is maintained on the public registry and is available to any interested parties upon request. The Licensee shall note that the NWB requires the Annual Report to be submitted on a standardized form which can be downloaded from the NWB ftp site located at <http://ftp.nunavut.ca/nwb/NWB%20Administration/NWB%20GENERAL%20INFORMATION/Standardized%20Forms/>.

C. Spill Contingency Planning

The Board generally requires that all Licensees prepare a comprehensive stand alone Spill Contingency Plan to establish a state of readiness to ensure a prompt and effective response to possible spills or system failure events. The site-specific spill contingency plan will assist the Licensee in responding to emergencies such that the impacts to water in particular and the environment and public health in general are minimized. The Plan submitted by the Licensee has been approved by the Board with the requirement that additional information be submitted as an addendum to the approved Plan as per Part H, Item 1 of this license.

D. Abandonment and Restoration (A&R)

To ensure that all future abandoned facilities are reclaimed in an appropriate manner, the NWB requires Licensees to submit an Abandonment and Restoration Plan. The Licensee is required to submit, for approval of the Board, an Abandonment and Reclamation Plan as per Part I, Item 1 of this Licence.

LICENCE 2BE-CNA0608 –Type “B”

Pursuant to the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* and the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*, the Nunavut Water Board, hereinafter referred to as the Board, hereby grants to

STORNOWAY DIAMOND CORPORATION

(Licensee)

of

860-635 HOWE STREET, VANCOUVER, BC V6C 2T6

(Mailing Address)

hereinafter called the Licensee, the right to alter, divert or otherwise use water for a period subject to restrictions and conditions contained within this licence:

PART A: SCOPE, DEFINITIONS AND ENFORCEMENT

1. Scope

This Licence allows for the use of water and the disposal of waste for an undertaking classified as Mining and Milling at camp locations within the Kitikmeot and Kivalliq Regions, Nunavut (camp latitudes and longitudes are listed in Table 1);

- i. This Licence is issued subject to the conditions contained herein with respect to the taking of water and the depositing of waste of any type in any waters or in any place under any conditions where such waste or any other waste that results from the deposits of such waste may enter any waters. Whenever new Regulations are made or existing Regulations are amended by the Governor in Council under the Nunavut Waters and Nunavut Surface Rights Tribunal Act, or other statutes imposing more stringent conditions relating to the quantity or type of waste that may be so deposited or under which any such waste may be so deposited, this Licence shall be deemed, upon promulgation of such Regulations, to be subject to such requirements; and;
- ii. Compliance with the terms and conditions of this Licence does not absolve the Licensee from responsibility for compliance with the requirements of all applicable Federal, Territorial and Municipal legislation.

2. Definitions

In this Licence: **2BE-CNA0608 -Type “B”**

“Act” means the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

“Amendment” means a change to original terms and conditions of this licence requiring correction, addition or deletion of specific terms and conditions of the licence; modifications inconsistent with the terms of the set terms and conditions of the Licence;

“Appurtenant Undertaking” means an undertaking in relation to which a use of waters or a deposit of waste is permitted by a licence issued by the Board;

“Board” means the Nunavut Water Board established under the *Nunavut Land Claims Agreement* and the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

“Chief Administrative Officer” means the Executive Director of the Nunavut Water Board;

“Engineer” means a professional engineer registered to practice in Nunavut in accordance with the Engineering, Geological and Geophysical Act (Nunavut) S.N.W.T. 1998, c.38, s.5;

“Greywater” means all liquid wastes from showers, baths, sinks, kitchens and domestic washing facilities, but does not include toilet wastes;

“Hazardous waste” means waste classified as “hazardous” by Nunavut Territorial or Federal Legislation, or as “dangerous goods” under the *Transportation of Dangerous Goods Act* at the time of clean-up;

“Inspector” means an Inspector designated by the Minister under Section 85 (1) of the *Act*;

“Licensee” means the holder of this Licence;

“Modification” means an alteration to a physical work that introduces a new structure or eliminates an existing structure and does not alter the purpose or function of the work, but does not include an expansion;

“Nunavut Land Claims Agreement” (NLCA) means the “*Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada*”, including its preamble and schedules, and any amendments to that agreement made pursuant to it;

“Regulations” means the *Northwest Territories Water Regulations* sor/93-303 8th June, 1993;

“Sewage” means all toilet wastes and greywater;

“Spill Contingency Plan” means a Plan developed to deal with unforeseen petroleum and chemical events that may occur during the operations conducted under the Licence;

“Sump” means an excavation in soil for the purpose of catching or storing fluids;

“Toilet Wastes” means all human excreta and associated products, but does not include greywater;

“Waste” means, as defined in S.4 of the *Act*, any substance that, by itself or in combination with other substances found in water, would have the effect of altering the quality of any water to which the substance is added to an extent that is detrimental to its use by people or by any animal, fish or plant, or any water that would have that effect because of the quantity or concentration of the substances contained in it or because it has been treated or changed, by heat or other means;

“Waste Disposal Facilities” means all facilities designated for the disposal of waste, and includes all sumps, latrine pits, and approved incinerators, as referenced in the Application for Water Licence filed by the Applicant on July 21, 2005; and

“Water Supply Facilities” comprises the area and associated intake infrastructure at lake water sources adjacent to the camp and lake and pond water sources proximal to the drilling locations, as described in the Application for Water Licence filed by the Applicant on July 21, 2005.

3. Enforcement

- i. Failure to comply with this Licence will be a violation of the *Act*, subjecting the Licensee to the enforcement measures and the penalties provided for in the *Act*;
- ii. All inspection and enforcement services regarding this Licence will be provided by Inspectors appointed under the *Act*; and
- iii. For the purpose of enforcing this Licence and with respect to the use of water and deposit or discharge of waste by the licensee, Inspectors appointed under the *Act*, hold all powers, privileges and protections that are conferred upon them by the *Act* or by other applicable law.

PART B: GENERAL CONDITIONS

1. The Water use fee shall be paid annually, in advance of any use, in accordance with Section 9 of the Regulations.
2. Licensee shall file an Annual Report on the appurtenant undertaking with the Board not later than March 31st of the year following the calendar year being reported which shall contain the following information:
 - i. A summary report of water use and waste disposal activities;
 - ii. A list of unauthorized discharges and a summary of follow-up actions taken;

- iii. Revisions to the Spill Contingency Plan and Abandonment and Restoration Plan;
 - iv. Progressive reclamation work undertaken;
 - v. All information as required by Part J, Item 6;
 - vi. Site photographs with complimentary documentation detailing the Water Supply Facilities, Waste Disposal Facilities and general site;
 - vii. All information as required by Part F, Item 8; and
 - viii. Any other details on water use or waste disposal requested by the Board by November 1 of the year being reported.
3. The Licensee shall notify the NWB of any changes in operating plans or conditions associated with this project at least thirty (30) days prior to any such change.
 4. The Licensee shall install flow meters or other such devices, or implement suitable methods required for the measuring of water volumes, to be operated and maintained to the satisfaction of an Inspector.
 5. If the Licensee contemplates the renewal of Licence No. 2BE-CNA0608, it is the responsibility of the Licensee to apply to the NWB for its renewal. The past performance of the Licensee, new documentation and information, and issues raised during a public hearing, if the NWB is required to hold one, will be used to determine the terms and conditions of the Licence renewal. Note that if the Licence expires before the NWB issues a new one, then water use and waste disposal must cease, or the Licensee will be in contravention of the Nunavut Land Claims Agreement. The NWB recommends that an application for the renewal of Licence No. 2BE-CNA0608 be filed at least four months before the Licence expiry date.
 6. If Licence No. 2BE-CNA0608 requires an amendment, a public hearing may be required. The Licensee should submit applications for amendment as soon as possible to give the NWB sufficient time to go through the amendment process. The process may vary depending on the scope of the amendment requested.
 7. The Licensee shall ensure a copy of this Licence is maintained at the site of operations at all times. Any communication with respect to this Licence shall be made in writing to the attention of:

(i) Chief Administrative Officer:

Executive Director
Nunavut Water Board
P.O. Box 119
Gjoa Haven, NU X0B 1J0
Telephone: (867) 360-6338
Fax: (867) 360-6369

(ii) Inspector Contact:

Water Resources Officer
Nunavut District, Nunavut Region
P.O. Box 100
Iqaluit, NU X0A 0H0
Telephone: (867) 975-4298
Fax: (867) 979-6445

8. The Licensee shall submit one paper copy and one electronic copy of all reports, studies, and plans to the Board. Reports or studies submitted to the Board by the Licensee shall include a detailed executive summary in Inuktitut.
9. The Licence is not assignable except as provided in Section 44 of the *Act*.

PART C: CONDITIONS APPLYING TO WATER USE

1. The Licensee shall obtain water for domestic use from the lake water source located adjacent to the camp, up to a maximum of 5 cubic meters per day. Water use for drilling operations shall be obtained from lake or pond water sources proximal to the drilling locations and is not to exceed 20 cubic meters per day.
2. The Licensee shall equip all water intake hoses with a screen of an appropriate mesh size to ensure that there is no entrainment of fish and shall withdraw water at a rate such that fish do not become impinged on the screen.
3. The Licensee shall not remove any material from below the ordinary high water mark of any water body.
4. The Licensee shall not do anything that will cause erosion to the banks of any body of water and shall provide necessary controls to prevent such erosion.
5. Sediment and erosion control measures shall be implemented prior to and maintained during the operation to prevent entry of sediment into water.

6. If the drilling requires water in sufficient volume that the source water body may be drawn down the Licensee shall, at least 30 days prior to commencement of drilling, submit to the Board for approval the following: volume required, hydrological overview of the water body, details of impacts, and proposed mitigation measures. The use of rivers/streams is not recommended as a water source.

PART D: CONDITIONS APPLYING TO WASTE DISPOSAL

1. The Licensee shall locate areas designated for waste disposal at least thirty (30) metres above the ordinary high water mark of any water body such that the quality, quantity or flow of water is not impaired, unless otherwise authorized by the Board.
2. No open burning or on-site land filling of domestic waste is permitted.
3. The Licensee shall incinerate all combustible waste in an approved incinerator, and shall ensure that all hazardous wastes, waste oil and non-combustible waste generated through the course of the operation are backhauled and disposed of in an approved waste disposal site.
4. The Licensee shall contain all greywater in a sump located at least thirty (30) metres above the ordinary high water mark of any water body, at a site where direct flow into a water body is not possible and no additional impacts are created.
5. The Licensee shall contain all sewage in latrine pits located at least thirty (30) metres above the ordinary high water mark of any water body. These latrine pits shall be treated with lime and covered with native material to achieve the pre-existing natural contours of the land prior to abandonment.

PART E: CONDITIONS FOR CAMPS, ACCESS INFRASTRUCTURE AND OPERATIONS

1. The Licensee shall not erect camps or store material on the surface of frozen streams or lakes except what is for immediate use. Camps shall be located such as to minimize impacts on surface drainage.
2. All activities shall be conducted in such a way as to minimize impacts on surface drainage and the Licensee shall immediately undertake any corrective measures in the event of any impacts on surface drainage.
3. Winter lake and stream crossings, including ice bridges, shall be constructed entirely of

water, ice or snow; stream crossings shall be removed or notched prior to spring break-up.

4. With respect to access road, pad construction or other earthworks, the deposition of debris or sediment into any water body is prohibited. These materials shall be disposed of above the ordinary high water mark in such a fashion that they do not enter the water.

PART F: CONDITIONS APPLYING TO DRILLING OPERATIONS

1. The Licensee shall not conduct any land based drilling within thirty (30) metres of the ordinary high water mark of any water body, unless otherwise approved by the Board.
2. The Licensee shall, for all land based drilling within thirty (30) metres of the ordinary high water mark of any water body, at a minimum;
 - i. Utilize sedimentation prevention procedures including the use of temporary silt curtains and/or silt fences. These measures shall be implemented prior to and maintained during the operation to prevent entry of sediment into water;
 - ii. Ensure that the movement of heavy equipment onto the designated drill sites is carried out in such a manner as to prevent erosion of ground material and shall provide the necessary controls to prevent such erosion; and
 - iii. Utilize a sludge recovery system for the conservation and re-use of water and to provide for the removal of cuttings for disposal.
3. The Licensee shall ensure that all drill cuttings and any return water and sludge that cannot be re-circulated, including CaCl in any quantity or concentration, be disposed of in a properly constructed sump or an appropriate natural depression located at least thirty (30) metres above the ordinary high water mark of any adjacent water body, where direct flow into a water body is not possible and no additional impacts are created.
4. Drilling additives or mud shall not be used in connection with holes drilled through lake ice unless they are re-circulated or contained such that they do not enter the water, or are demonstrated to be non-toxic.
5. If artesian flow is encountered, drill holes shall be plugged and permanently sealed upon project termination.
6. For all on-ice drilling operations, the Licensee shall ensure that any water released is non-toxic and will not result in an increase in total suspended solids in the immediate receiving waters above the Guidelines for Total Suspended Solids contained in the

Canadian Council of Ministers of the Environment's (CCME) Canadian Water Quality Guidelines for the Protection of Freshwater Aquatic Life (ie: 10mg/L for lakes with background levels under 100mg/L, or 10% for those above 100mg/L).

7. The Licensee shall establish baseline water quality conditions before drilling through lake ice and the results shall be submitted to the Nunavut Water Board and/or an Inspector upon request.
8. The Licensee shall report in the filed Annual Report how and if any conditions applying to drilling operations were satisfied during the Licensee's drill program.

PART G: CONDITIONS APPLYING TO MODIFICATIONS

1. The Licensee may, without written consent from the Board, carry out Modifications to the Water Supply Facilities and Waste Disposal Facilities provided that such Modifications are consistent with the terms of this License and the following requirements are met:
 - i. The Licensee has notified the Board in writing of such proposed Modifications at least ninety (90) days prior to beginning the Modifications;
 - ii. Such Modifications do not place the Licensee in contravention of the License or the *Act*;
 - iii. The Board has not, during the ninety (90) days following notification of the proposed Modifications, informed the Licensee that review of the proposal will require more than ninety (90) days; and
 - iv. The Board has not rejected the proposed Modifications.
2. Modifications for which all of the conditions referred to in Part G, Item 1 have not been met can be carried out only with written approval from the Board.
3. The Licensee shall provide as-built plans and drawings of the Modifications referred to in this License within ninety (90) days of completion of the Modification. These plans and drawings shall be signed and stamped by an Engineer.

PART H: CONDITIONS APPLYING TO SPILL CONTINGENCY PLANNING

1. The Licensee shall within thirty (30) days of issuance of this licence, submit to the Board an addendum to the site specific Spill Contingency Plan that includes the following:
 - i. Inclusion of a Plan title page, table of contents, introduction and description of site along with a stated effective in-use period of the Plan;
 - ii. A detailed site map outlining camp location, fuel storage areas, Water Supply Facilities, Waste Disposal Facilities, equipment and supplies, and other site specific geographical information;
 - iii. The name of the designated On-Site Person in charge and a 24-hour contact number;
 - iv. A Nunavut-NWT Spill Report Form for recording and reporting of spill should be included in the Plan;
 - v. The contents of the spill kits located on-site;
 - vi. The appropriate addition of contact names and numbers of those who should be made aware of a spill at INAC, EC, DFO, KIA, GN-DOE, and NWB; and
 - vii. A listing of the preparation and training provided to those on-site and a listing of the Stornoway chain of command for responding to fuel spills;
2. If the addendum referred to in Part H, Item 1 is not accepted, the Licensee shall make the necessary changes and resubmit the plan within thirty (30) days following notification from the Board.
3. The Licensee shall annually review the approved Plan referred in Part H Item 1, and if needed, modify the Plan to reflect changes in personnel, operations and/or technology. Revisions shall be submitted with the Annual Report as an addendum to the Plan for the approval of the Board in accordance with Part B, Item 2(iii).
4. The Licensee shall ensure that any chemicals, petroleum products or wastes associated with the project do not enter water. All sumps and fuel caches shall be located a minimum of thirty (30) metres above the ordinary high water mark of any adjacent water body and inspected on a regular basis. The Licensee is encouraged to use some form of secondary containment.
5. The Licensee shall ensure that any equipment maintenance and servicing be conducted only in designated areas and shall implement special procedures (such as the use of drip

pans) to manage fluids, waste and contain potential spills.

6. This updated Contingency Plan shall indicate the location (including GPS co-ordinates) of all fuel storage areas associated with the undertaking. The Licensee shall report the manufacture type of GPS receiver used in the determination of the co-ordinates and the number of iterations taken for the determination each co-ordinate.
7. If during the term of this Licence, an unauthorized discharge of waste occurs, or if such a discharge is foreseeable, the Licensee shall:
 - i. Employ the Spill Contingency Plan;
 - ii. Report the spill immediately to the 24-Hour Spill Line at (867) 920-8130 and to the DIAND Water Resources Inspector at (867) 975-4298; and
 - iii. Submit to the DIAND Water Resources Inspector on each occurrence, a detailed report including the GPS location, no later than thirty (30) days after initially reporting the event.

PART I: CONDITIONS APPLYING TO ABANDONMENT AND RESTORATION

1. The Licensee shall submit to the Board for approval within thirty (30) days of issuance of this Licence, an Abandonment and Restoration Plan prepared in accordance with applicable sections of the "*Guidelines for Abandonment and Restoration Planning for Mines in the Northwest Territories (1990)*".
2. If the Plan referred to in Part I, Item 1 is not approved by the Board, the Licensee shall revise the Plan and resubmit within sixty (60) days following notification from the Board.
3. The Licensee shall annually review the Plan referred to in Part I, Item 1 and if needed, modify the Plan to reflect changes in personnel, operation, and/or technology. Revisions shall be submitted with the Annual Report as an addendum to the Plan for the approval of the Board in accordance with Part B, Item 2 (iii).
4. The Licensee shall implement the Abandonment and Restoration Plan as approved.
5. The Licensee shall complete the restoration work within the time schedule specified in the approved Plan, or as subsequently revised and approved by the Board.
6. The Licensee shall endeavor to carry out progressive reclamation for any components of the project no longer required for the Licensee's operations.

7. The Licensee shall backfill and restore, to the satisfaction of an Inspector, all camp and drilling waste disposal sumps to the pre-existing natural contours of the land prior to the expiry of this Licence.
8. All disturbed areas shall be stabilized and re-vegetated as required, upon completion of work, and restored to a pre-disturbed state.

PART J: CONDITIONS APPLYING TO THE MONITORING PROGRAM

1. The Licensee shall measure and record in cubic metres the daily quantities of water utilized for camp operations and drilling operations, for all purposes.
2. The Licensee shall determine the GPS co-ordinates (in degrees, minutes and seconds of latitude and longitude) of all locations where sources of water are utilized for all purposes. The Licensee shall report the manufacture type of GPS receiver used in the determination of the co-ordinates and the number of iterations taken for the determination each co-ordinate.
3. The Licensee shall determine the GPS co-ordinates (in degrees, minutes and seconds of latitude and longitude) of all locations where wastes associated with camp operations and drilling operations are deposited. The Licensee shall report the manufacture type of GPS receiver used in the determination of the co-ordinates and the number of iterations taken for the determination each co-ordinate.
4. The Licensee shall establish baseline water quality conditions before drilling through lake ice as per Part F, Item 7 and when drilling adjacent to lakes as per Part F, Item 2. Monitoring shall include but not be limited to the following:
 - Total Suspended Solids
 - pH
 - Electrical Conductivity, and
 - Total Metals as determined by an ICP 32 element scan
5. Additional sampling and analysis may be requested by an Inspector.
6. The Licensee shall include all of the data and information required by this Part in the Licensee's Annual Report, as required per Part B, Item 2.
7. Modifications to the Monitoring Program may be made only upon written approval of the Chief Administrative Officer.
8. All sampling, sample preservation and analyses shall be conducted in accordance with

methods prescribed in the current edition of “Standard Methods for the Examination of Water and Wastewater”, or by such other methods as approved by the Board.

9. All analyses shall be performed in a Canadian Association of Environmental Analytical Laboratories (CAEAL) Certified Laboratory, or as approved by the Board.
