Hi Chris,

The Nunavut Water Board ("NWB") is currently at the final stages of the licensing process for the above-mentioned application. However, before the NWB could issue a decision regarding the application, could you please confirm, at your earliest convenience, whether the issues identified in Indigenous and Northern Affairs Canada's (INAC) September 7, 2016 Inspection Report for the Coppermine Project have been addressed or whether any response was provided to INAC with respect to the same report.

Regard,

Sean Joseph

Senior Technical Advisor, NWB
