Good afternoon Mr. Penner,

RE: Tundra Copper Exploration

Thank you for your email.

The Nunavut Planning Commission (NPC) has reviewed the attached document and has determined that the project proposal as described is located outside the boundaries of the two approved land use plans currently administered by the NPC.

No further review is required by the NPC at this time.

Please ensure that any change in scope of the proposed project is forwarded to the NPC so as a determination can be made as to whether a conformity review is required.

Please contact me should you have any questions.

Sincerely,

Christopher Tickner MCIP, RPP

Subject: Tundra Copper Corp area of Exploration

Hello Christopher:

Further to our earlier telephone conversation, please find attached a pdf of a google earth image that shows the extent of our area of exploration with coordinates shown at each of the corners. Our exploration will be confined to a few specific areas within the boundaries shown. Please indicate if a land use plan conformity determination is required. If not, please send me an email that I can include in my water permit application. We plan to carry out an early stage mineral exploration program this summer that will include setting up a camp and carrying out a small drilling program. We anticipate that this will last about 1 month.

Best regards,

Donald Penner, P.Geo.
