

Crater Lake Camp and Airstrip Layout

The camp is used as a base for grassroots mineral exploration, with Twin Otter and/or helicopter support. The Camp and Airstrip were built in 1997 and have since been used intermittently during the summer exploration season. The airstrip is a natural gravel strip that was originally hand-picked to remove larger boulders. No mechanical strip preparation was required for Twin Otters equipped with tundra tyres. Equipment (fuel, lumber, staking posts, etc) and personnel and crew members have been mobilised in and out of camp using the airstrip and/or helicopters.

Proposed Ingot Camp and Airstrip Layout

The camp will be used as a base for grassroots mineral exploration, with Twin Otter and/or helicopter support. The camp will be used seasonally. The airstrip is a natural gravel strip. No mechanical strip preparation is required for Twin Otters equipped with tundra tyres. Equipment (fuel, lumber, staking posts, etc) and personnel and crew members will be mobilised in and out of camp using the airstrip and/or helicopters.
