

WASTE TREATMENT AND DISPOSAL

1. Describe the characteristics, quantities, treatment and disposal methods for: **see attached environmental procedures plan**

- ☒ Camp Sewage (blackwater)
Contained and incinerated in Pacto toilets
- ☒ Camp Greywater
Sump
- ☒ Solid Waste
Incineration/shipped off site
- ☒ Bulky Items/Scrap Metal
shipped off site
- ☒ Waste Oil/Hazardous Waste
Waste oil will be burned. Hazardous waste shipped off site.
- ☒ Empty Barrels/Fuel Drums
shipped off site
- ☐ Other: _____

2. Please describe incineration system if used on site. What types of wastes will be incinerated?

The camp incinerator will be a forced-air, diesel fired system mounted to a metal skid. Blackwater, solid waste and waste oil will be incinerated with this equipment.

3. Where and how will non-combustible waste be disposed of. If in a municipality in Nunavut, has authorization been granted?

All inert waste shipped off site will be disposed of in the appropriate municipal/city dump.

4. Describe location (relative to water bodies and camp facilities) dimensions and volume, and freeboard for sumps (if applicable).

One sump between the kitchen and dry with dimensions of 2m x 2m x 1.2m (4.8m³), more than 100 m from surface water.

5. Will leachate monitoring be done? What parameters will be sampled and analyzed, and at what frequency?

N/A
