EXPLORATION/ REMOTE CAMP SUPPLEMENTARY QUESTIONNAIRE

Applicant:			Licence No:	Licence No:	
				(For NWB Use Only)	
ADN	/INISTRATIV	VE INFORMATION			
1.	Environmen	t Manager: Andrew Turner	Tel: (780) 439-5380	Fax: <u>(780) 439-7308</u>	
2.	Project Man	ager: Andrew Turner	Tel: (780) 439-5380	Fax: (780) 439-7308	
3.	Does the app	plicant hold the necessary prop	erty rights? Yes		
4.	Is the applicant an 'operator' for another company (i.e., the holder of the property rights) If so, please provide letter of authorization. No				
5. C AN	Duration of to the Duration of	Annual Multi Year: If Multi-Year indicate propostart: March 2007			
CAN					
6.	Type of Can □ □ ⊠	Mobile (self-propelled) Temporary Seasonally Occupied: <u>Exp</u> camp, Crater Lake Camp Permanent Other:	and Ingot Camp	es Camp, Bullion	
7.		design population of the camp What will be the fluctuations i		llation expected on site	
	personnel when the personnel whe	pical personnel, 2 cooks, 1 pilot, hen required. Max = 35 at one on or Crater Camps cal personnel, 1 cook, 1 pilot, 1 hen required. Max = 15 per car	time when drilling. engineer, \pm 4 drill crew	v, and 1 camp	

8. Provide history of the site if it has been used in the past.

Hayes Camp – operation since 1994 Crater Lake Camp – operational since 1997 Bullion camp – since 2004 Ingot Camp – new 2005 All used as geological base camps, seasonally when required.

CAMP LOCATION

9. Please describe proposed camp location in relation to biogeographical and geomorphological features, and water bodies.

Camps are located on eskers close to lake shores. Locations are in UTM, Nad 83 Zone 15

10. How was the location of the camp selected? Was the site previously used? Was assistance from the Regional Inuit Association Land Manager sought? Include maps and/or aerial photographs.

Sites were selected on the basis of location, proximity to exploration areas, relatively flat ground, and geology.

11. Is the camp or any aspect of the project located on:

⊠Crown Lands Permit Number (s)/Expiry Date: N2007C0001 May 21, 2009

N2007C0002 May 21, 2009

□Commissioners Lands Permit Number (s)/Expiry Date: ___

☑Inuit Owned Lands Permit Number (s)/Expiry Date:KTL306C031 January 31,2009

KTL305C004 May 31, 2009

12. Closest Communities (distance in km):

Pelly Bay to Hayes Camp – 250 km Repulse Bay to Hayes Camp – 240 km Pelly Bay to Crater Camp – 135 km Repulse Bay to Crater Camp – 150 km

13.	interested parties about the proposed work?				
	Yes				
14.		Will the project have impacts on traditional water use areas used by the nearby communities? Will the project have impacts on local fish and wildlife habitats?			
	No

DDII	T INC	INFORMATION			
DKII	LING	INFORMATION			
18.	Drill	ing Activities			
10.	× ×	Land Based drilling			
		Drilling on ice			
	_	0			
19.	Desc	ribe what will be done with drill cuttings?			

All land-based drill cuttings are pumped to a sump which is either a natural depression or a dyke that is temporarily deployed, both of which trap the drill cuttings and allow the water to drain away. The drill cuttings are then re-habilitated with peat moss and

fertilizer.

20. Describe what will be done with drill water?

All land based drilling fluids will be treated in sumps to collect cuttings, allowing the water to drain into the surrounding landscape.

21. List the brand names and constituents of the drill additives to be used? Includes MSDS sheets and provide confirmation that the additives are non-toxic and biodegradable.

550x Polymer, Linseed Soap, Big Bear Diamond Rod Grease

22. Will any core testing be done on site? Describe.

Core will be moved to the nearest camp to be cut or mechanically split and sampled.

SPILL CONTINGENCY PLANNING

23. Does the proponent have a spill contingency plan in place? Please include for review.

See Spill Contingency Plan included dated Dec, 2003

24. How many spill kits will be on site and where will they be located?

Three large spill kits will be positioned around the main fuel cache. A smaller kit will be placed at each of the operating drills, the generator shack, with each piece of heavy equipment, the incinerator and the helicopter pad (i.e. wherever fuel is transferred or stored).

25. Please describe the types, quantities, and method of storage of fuel and chemicals on site, and provide MSDS sheets.

See Environmental Procedures plan included dated Dec, 2003

WATER SUPPLY AND TREATMENT

26. Describe the location of water sources.

All camps are located close to lakes and numerous small ponds and lakes will be used for land based drilling.

27. Estimated demand: (based on max 35 people in camp, and max 15 in supplementary camp)

✓ Domestic Use: <u>2-4m³ per day</u> Water Source: <u>local camp lakes</u>

Drilling Units: 30m3 per day per drill Water Source: small lakes & ponds

		Other:	Water Source:		
28.	Describe water intake for camp operations? Is the water intake equipped with a mesh screen to prevent entrapment of fish? Describe:				
	Land	-based pump with filtered intal	ke.		
29.		drinking water quality be mone ency?	itored? What parameters will be analyzed and at what		
		•	or various types of coliform bacteria. This will be during our occupation and upon de-mobilization.		
30.	Will	Will drinking water be treated? How?			
	Wate	Water will be lightly chlorinated.			
31.	. Will water be stored on site?				
	Yes,	there will be three 250 gallon t	tank located at each camp for domestic use.		
WAS	TE TR	EATMENT AND DISPOSA	L		
32.		ribe the characteristics, quantit	ies, treatment and disposal methods for: see attached		
	envir ×	Camp Sewage (blackwater)			
	_	Contained and incinerated in	n Pacto toilets		
	X	Camp Greywater			
		Sump			
	X	Solid Waste			
	_	Incineration/shipped off site			
	X	Bulky Items/Scrap Metal shipped off site			
	X	Waste Oil/Hazardous Waste			
			aste will be shipped off site intended for a registered		
		disposal company.			
	X	Empty Barrels/Fuel Drums			
	_	shipped off site			
		Other:			
33.		Please describe incineration system if used on site. What types of wastes will be incinerated?			

The camp incinerator will be a forced-air, diesel fired system mounted to a metal skid.

Blackwater, solid waste will be incinerated with this equipment.

34. Where and how will non-combustible waste be disposed of. If in a municipality in Nunavut, has authorization been granted?

All inert waste shipped off site will be disposed of in the appropriate municipal/city dump.

35. Describe location (relative to water bodies and camp facilities) dimensions and volume, and freeboard for sumps (if applicable).

One sump between the kitchen and dry with dimensions of 3m x 3m x 1.2m (10.8m³), more than 100 m from surface water.

36. Will leachate monitoring be done? What parameters will be sampled and analyzed, and at what frequency?

N/A

OPERATION AND MAINTENANCE

37. Have the water supply and waste treatment and disposal methods been used and proven in cold climate? What known O&M problems may occur? What contingency plans are in place?

In use since 1994 and 1997 at present locations. No problems reported.

ABANDONMENT AND RESTORATION

38. Provide a detailed description of progressive and final abandonment and restoration activities at the site.

See Environmental Procedure Plans attached

BASELINE DATA

39.		r will any baseline information be collected as part of this project? Provide
	biblic	graphy.
	X	Physical Environment (Landscape and Terrain, Air, Water, etc.)
		Biological Environment (Vegetation, Wildlife, Birds, Fish and Other Aquatic
		Organisms, etc.)
		Socio-Economic Environment (Archaeology, Land and Resources Use,
		Demographics, Social and Culture Patterns, etc.)
