**RE: Application for amendment of Water Licence 2BE-CRA1520**

Dear Ms Beaulieu,

North Country Gold Corp. (NCG) would like to request an amendment to 2BE-CRA1520 for the Committee Bay Project (CBP) located in the eastern Kitikmeot region of Nunavut Territory.

In February 2015, NCG signed a Joint Exploration Agreement with Vancouver based Auryn Resources (AUG) whereby AUG has the option to spend \$6 million over a 30th month period to earn a 51% interest in the mineral concessions comprising the Committee Bay Project. The Joint Venture (JV) plans to continue exploration activity in 2015 with a systematic approach to test various prospects outside of the Three Bluffs Deposit already identified.

There is no proposed change in scope of the project. During the 2015 exploration summer season the JV is proposing the following regional exploration program:

- Ground IP geophysical surveys over selected prospects.
- Utilize GT Probe rubber track mounted soil sampling unit to systematically soil sample over selected areas.
- Utilize GT RAB drill rubber track mounted unit to systematically sample bedrock in a quick and cost effective manner over selected areas.
- Prospecting and Geological Mapping: mapping and/or gridding on various scales may be required, property wide.
- Utilize up to 12 fly camps (up to 2 concurrently) to facilitate geophysics, drilling, soils sampling and/or prospecting.

While the RAB and Probe drills do not use any water, fly camps will require modest amount of water for domestic use. NCG proposes to use up to 2 fly camps concurrently with 1-2 main camps supporting exploration logistics staying within the 50m3 per day limit currently approved on our active NWB Licence. All waste will be subject to existing approved plans of operation. NCG does request the option to open burn small amounts of approved materials at a fly camp as appropriate.

A hard copy set of documents and cheque for \$30 to cover the application will be mailed to your office.

Please do not hesitate to contact me if you can have further questions or concerns. We look forward to hearing from you.

Sincerely

**Jo Price M.Sc., P.Geol.**
