Hi Simeon,

Section 23 means to review the latest AANDC Inspection report to ensure there are no issues of non-compliance outstanding. I am assuming this query pertains to the file 2BE-CRA1015 and I note that a July 2014 inspection is on file with responses from NCG also on file at the following link.

If there are still outstanding issues they will need to be addressed at some point.

Here is the link to the inspection folder. The USERNAME for our ftp site is *public* and the PASSWORD is *registry*

An SIG may not be required at this time. Once we review the renewal application we will advise of any outstanding information requirements.

Hi Phyllis,

I have a couple of questions regarding the water licence renewal application form:

1) Under section 23 of the form it states: *Provide a compliance assessment and status report including a response to any inspector's reports. The licensee must contact the NWB for licence specific direction in completing the assessment and report.*

Are you able to clarify what is required? I will include NCGC's inspection reports, NCGC's responses and actions taken, and highlight outstanding issues. Is anything else required.

2) As this is a renewal, am I required to complete any SIG or supplementary questionnaires?

Thank you for your assistance.

Regards, Simeon
