Re: Application Acknowledgement for North Country Gold Corp.'s Application with Government of Nunavut – Community & Government Services for it's "Committee Bay Project - Camp and Airstrip"

Dear Kaveh Bajgiran:

On July 19, 2012, the Nunavut Impact Review Board (NIRB or Board) received an application from the Municipality of Rankin Inlet for a Land Use Permit in support of North Country Gold Corp.'s "Committee Bay Project - Camp and Airstrip" project. On August 15, 2012 the NIRB received a positive conformity determination (Keewatin Regional Land Use Plan) from the Nunavut Planning Commission for this application.

Original Project:

Please be advised that the original project proposal (NIRB File No.: 07EN021) was received by the NIRB from Indian and Northern Affairs Canada (INAC; now Aboriginal Affairs and Northern Development Canada or AANDC) on March 1, 2007. The proposal was screened in accordance with Part 4, Article 12 of the Nunavut Land Claims Agreement (NLCA) and on May 11, 2007 the NIRB issued a screening decision to the Minister of INAC which indicated that the proposed project could proceed subject to the NIRB's recommended project specific terms and conditions (Screening Decision Report or SDR, May 11, 2007).

The following table is a summary of the additional amendment, extension and authorization requests associated with this project that have been reviewed by the NIRB following screening of the original project proposal.

Authorization	Application		NIRB Decision	
	Date Received by NIRB	Type	Date	Type
Water Licence (2BE-CRA0710)	February 29, 2008	Amendment	March 28, 2008	Exempt from Screening, reissued the May 11, 2007 SDR
Land Use Permit (N2007C0001 and N2007C002)	January 26, 2009	Extension	February 11, 2009	Exempt from Screening, reissued the May 11, 2007 SDR
Land Use Permit (N2009C0018 and N2009C0019)	February 2, 2010	Amendment	February 26, 2010	SDR additional terms and conditions
Land Use Permit (N2009C0018)	December 15-16, 2010	Extension	January 28, 2011	SDR additional terms and conditions
Quarry Permit (056J12002)		New Permit		
Surface Lease (056J11001)		New Permit		
Land Use Permit (N2009C0019)	January 3, 2012	Extension	February 22, 2012	Exempt from Screening, reissued the January 28, 2011 SDR
Land Use Permit (N2009C0018)	January 25, 2012	Extension/Amendment		

Please see **Appendix A** for a more detailed description of the project scope as originally screened by the NIRB in 2007 and as has been amended through the various applications outlined in the table above.

Current Amendment:

North Country Gold Corp. is applying for a Land Use Permit within the Municipality of Rankin Inlet to implement the following additional components/activities:

- Temporary storage of 51,250 litres of diesel fuel secured in an insta-berm;
- Storage of 15 pallets of core boxes and one pallet of core box lids;
- Storage of four lifts of timber; and
- One sea can

The NIRB has determined that this request may result in a change to the original scope of the project.

The current Municipality of Rankin Inlet application and the original NIRB screening file, 07EN021 are available from NIRB's ftp site at the following link: <http://ftp.nirb.ca/01-SCREENINGS/COMPLETED%20SCREENINGS/2007/07EN021-Committee%20Bay/>.

Please note that Section 12.4.3 of the NLCA states that:

“Any application for a component or activity of a project proposal that has been permitted to proceed in accordance with these provisions shall be exempt from the requirement for screening by NIRB unless:

(a) such component or activity was not part of the original project proposal; or

(b) its inclusion would significantly modify the project.”

The NIRB is of the opinion that the request for the Land Use Permit application is not likely to *significantly* change the general scope of the original project activities. Therefore the NIRB is *proposing* to re-issue the same terms and conditions as those in the attached January 28, 2011 Screening Decision, along with any new terms and conditions the NIRB considers appropriate. The NIRB is copying parties and municipalities potentially affected by this project and we invite interested persons to comment directly to the NIRB by **August 27, 2012**.

The NIRB would like Parties to provide comments regarding:

- Whether the inclusion of the additionally proposed component(s) and/or activity(ies) would significantly modify the project;
- Any additional mitigation measures that are appropriate; and
- Any other matter of importance to the Party related to the project proposal.

Please send your comments directly to the NIRB at info@nirb.ca or via fax to **(867) 983-2594**.

If you have any questions or concerns, please do not hesitate to contact the NIRB's Assistant Technical Advisor Tannis Bolt at tbolt@nirb.ca or by phone 867-983-4603.

Sincerely,

Tannis Bolt

NIRB Screening Decision Report, File No.: 07EN021 (January 28, 2011)

Appendix A

Scope of Previously Screened Activities

As previously screened by the NIRB (File No. 07EN021), the “Committee Bay Project - Camp and Airstrip” project was located within the Kitikmeot region, approximately 220 kilometres (km) southwest of Kugaaruk, and 235 km west of Repulse Bay near the northern border of Ukkusiksalik National Park. The Proponent indicated that it intended to explore potential gold deposits along the Committee Bay Greenstone Belt seasonally from March 2007 to March 2009.

Project components/activities included the following:

- Use of existing seasonal exploration camps at Ingot, Crater, Hayes and Bullion camps between March and September;
- Construction of temporary ice strip on lake at Hayes Camp;
- Use of existing airstrip at Crater Lake Camp;
- Landing of aircraft with tundra tires on an esker at Ingot Camp;
- Exploration activities as well as transport of personnel and supplies supported by snow machines, helicopters and Twin Otter aircraft;
- Exploration and drilling on ice and on land;
- Chemical storage of drilling fluids;
- Fuel transportation and storage;
- Geochemical soil sampling;
- Gridding and ground geophysical surveys;
- Geological mapping and prospecting, sampling (rock, till and water) and stacking;
- Consumption of water for drilling purposes;
- Generation of waste and wastewater;
- Preparation of landing site for helicopter; and
- Baseline environmental work at Hayes Camp.

The activities and components associated with the previous February 29, 2008 water license 2BE-CRA0710 amendment included:

- Additional domestic water use for camps and new drill sites for 2008 field season.

The January 26, 2009 extension requests for INAC Land Use Permits N2007C0001 and N2007C0002 involved activities in support of continued exploration at the Committee Bay Greenstone Belt for an additional two years, between March 2009 and March 2011.

The activities and components associated with the previous February 2, 2010 amendment application to the INAC Land Use Permits N2009C0018 and N2009C0019 included:

- Exploration activities to continue between March 1, 2010 and October 30, 2011;
- Increase the number of drills from 3 to 6;
- 6 drills to be used concurrently with 2 of the 4 camps open at any one time; and,
- Construction of a temporary winter road approximately 10 kilometres long from Hayes Camp to the Three Bluffs deposit for hauling water, drills and related equipment and personnel to the deposit to enable spring exploration drilling.

The activities and components associated with the December 2010 extension request for Land Use Permit N2009C0018 and the addition of a quarry permit and surface lease included:

- Intend to upgrade the existing infrastructure in order to facilitate increased exploration activities in the project area from March 1, 2011 to October 15, 2016;
- Increase exploration activities, including use of additional drills, and updating camp accommodation and services at the present Hayes Camp:
 - Use of 7 diamond and 2 RC drills positioned on the Three Bluffs Deposit for drilling of up to 60,000 metres in 2011 and 2012,
 - Airborne and ground geophysics surveys,
 - Geological mapping and prospecting,
 - Infrastructure upgrade to accommodate up to 100 persons,
 - Adding vehicles, heavy equipment, infrastructure, waste water treatment plant, incinerator, and drilling equipment.
- Improve and increase length of Hayes Camp airstrip:
 - Upgrade current esker airstrip to 3000 feet in length through levelling and grading,
 - Quarry approximately 5000 cubic metres of $\frac{3}{4}$ crush to top coat the airstrip.
- Build an all-weather road from Hayes Camp to the Three Bluffs Gold deposit including a 5000 foot airstrip:
 - Construct approximately 6-10 kilometre (km) of road connecting the Hayes Camp to the Three Bluffs Exploration Gold Deposit.
 - Temporary fuel storage for heavy equipment along the road corridor in 205 Litre drums with a maximum of 19 drums per cache, secured with berms and spill kits.
 - Installation of culverts as required for site drainage. Location of culverts to be determined based on 2011 hydrology survey. Currently no changes in water courses are planned.
 - Construction schedule:
 - April to June 2011, and Sept 2011: equipment mobilization
 - June to Sept 2011: Study hydrology and geomorphology of the proposed road corridor to assess the best position of the all-weather road
 - Sept 2011 to Aug 2013: road construction.

The activities and components associated with the January 3 and January 25, 2012 requests included NCG proposing to extend the term of both of its AANDC Land Use Permits (N2009C0019, N2009C0018) from March 2012 to March 2014, as well as to amend AANDC Land Use Permit N2009C0018 to include the following additional components:

- Use of explosives for blasting of gravel and/or work for the purposes of obtaining crushed material and aggregate to complete the upgrades to the all-weather 3000 foot airstrip at Hayes Camp including the addition of 2 explosive magazines and a mini drill which will also require a new quarry permit;
- Addition of new equipment: 2 Huggland personnel carriers, 1 All Track, and 4 additional snow machines;
- Addition of 2 new skid mounted 35,000 litre double walled fuel tanks to compliment the 2 already in place at the Hayes Camp to further reduce the need for drummed fuel;
- Total amount of fuel required for the 2012 season will remain at approximately 1,500,000 litres.
