RE: Water Licence 2BE-CRA1520
**   Addendum - Comprehensive Waste Management Plan**

Dear Ms. Beaulieu,

North Country Gold Corp ('NCGC') received a renewed water licence 2BE-CRA1520 on March 4, 2015.

Section IV '*General Considerations*', subsection '*Solid Waste*' (Page ix) of the Renewal Licence cover letter stated "…The Board has approved the Committee Bay Project Comprehensive Waste Management Plan (WMP of Plan) dated October 2014 as per Part D, Item 1 of the renewal Licence and requires that the Licensee implement the Plan accordingly. However, the Licensee is required to update the Plan and submit to the Board within 30 days of issuance of the Licence, in the form of an addendum complete with record of revision, to address AANDC comments with respect to open burning allowed only with the authorization of the NWB.

In accordance with this request, NCGC has made the following changes to the Comprehensive Waste Management Plan (Revision 0, October, 2014). The third paragraph under subsection 6.1.2 '*Combustible Waste*' previously read:

"*Large pieces of untreated wood, cardboard and material comprised of natural fibres will be burned in a controlled open burn in accordance with the Government of Nunavut's Guideline for the burning and incineration of solid waste*".

The Addendum to Comprehensive Waste Management Plan (as attached) changes this paragraph to read:

"*Large pieces of untreated wood, cardboard and material comprised of natural fibres may be burned in a controlled open burn in accordance with the Government of Nunavut's Guideline for the burning and incineration of solid waste when authorization has been granted by the Nunavut Water Board*".

I trust that these changes are considered acceptable to the Board. Please do not hesitate to contact me if you have any questions or comments.

Sincerely,

Simeon Robinson
Project Manager
