**RE: AMENDMENT FOR CAMP LOCATION AND FUEL CACHE, LICENCE
N2005C0028, INDICATOR MINERALS INC. DARBY PROJECT, COMMITTEE
BAY AREA, KITIKMEOT REGION, NUNAVUT**

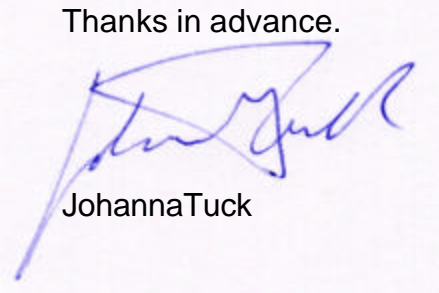

Dear Mr. Spencer Dewar,

Indicator Minerals Inc. has determined the location to construct a camp on the Darby Project. The camp location was chosen by proximity to a large lake for water use in spring conditions and an airstrip for landing a tundra tire equipped aircraft. We would like to begin constructing as soon as possible to utilize larger aircraft that may land on the ice for transporting camp materials on site. The camp location is UTM NAD 83 Zone 15W 498610E 7466710N. The camp will consist of approximately 4 sleep tents, a kitchen, dry, generator and toilet facilities and logging shack. Please see attached map for location of camp.

Indicator Minerals would like to establish a fuel cache at the camp site. We would like to store up to 200 drums of diesel fuel for camp and diamond drill use, 150 drums Jet fuel for helicopter and fixed wing support, and 40 100lb bottles of propane.

Please contact me at (250) 344-2345 or Dennis Doulos at (250) 491-1038 should there be any additional questions, comments or further requested information.

Thanks in advance.

JohannaTuck
