

Starfield Resources Inc.

February 6, 2001

Ms. Rita Becker
Nunavut Water Board
PO Box 119
Gjoa Haven, NT

Via email

Dear Ms. Becker

Please find attached a one year renewal application for our existing Water Licence File No. NWB2FER9901. As with our previous application all usage will remain the same except for:

- 1) there will be no drilling from the ice
- 2) I have requested from the Kivalliq Inuit Association a one year extension on our existing Land Use Permit No. KVL399C150 with an increase in bulk fuel storage on site to 700 bbl at one time.

During 1999 the company conducted baseline water studies at Ferguson Lake, this report is presently being prepared and two copies will be submitted upon completion.

In 2002, Starfield will be applying for an advanced exploration permit, however at this time, we request a one year extension on our existing permit.

Sincerely

R. (Bob) Krause, B.Sc.
Geologist
