## Re: Ferguson Lake Project – Reclamation and Closure Security Estimate for Type B Amendment for Bulk Sample and Exploration Trails

Canadian North Resources Inc. ("CNRI") Ferguson Lake Project has reclamation and closure securities held by the KIA for exploration camp and associated activities secured under existing KIA leases (KCL305H27- Commercial Lease, KVCA08Q17- Quarry Permit, N2013X0023-Right of Way). CNRI submits that:

- the current camp and exploration operations is located on Inuit Owned Land,
- no waters will be impacted by our exploration advancement,
- no additional water will be taken under the Type B Amendment, and
- CNRI remains committed to maintaining full compliance with our KIA leases, and
- the existing financial securities are adequate and should continue to be held with KIA.

As a result of the Type B Amendment activities, including bulk sample collection and exploration trail activities, we propose a phased approach to increasing the commercial lease financial securities to be held by KIA outlined in the Abandonment and Reclamation Plan (April 2025). This approach will ensure that closure securities are aligned with the scale and nature of site activities at Ferguson Lake Exploration Camp as they evolve.

The proposed cost estimates for the new activities under the Type B Amendment have been prepared using the CIRNAC RECLAIM V8.0¹ estimator to ensure consistency with KIA, territorial and federal standards. Total costs are presented in **Table 1**. We propose the following security tranches to increase the commercial lease security amount over the next few years of the Ferguson Lake Project advancement:

## 1. Initial Tranche - Commercial Lease Adjustment (\$55,377.88):

This increase reflects the enhanced level of activity including the trail to the mini-bulk sample in 2025-2027 and provides additional assurance in line with updated RECLAIM V8.0.

## 2. Second Tranche – Trail Construction (\$108,517.50):

A subsequent tranche will be submitted to reflect activities related to the construction of exploration trails to facilitate exploration access and operational efficiency.

## 3. Final Tranches - Bulk Sample and Supporting Activities:

Additional securities will be provided in alignment with activities associated with the collection of a bulk sample, greater than 2000 tonnes. An additional **Tranche 3 of \$55,421.88** will be added to the commercial lease security. If greater than 5000 or less than 10,000 tonnes, an additional **Tranche 4 of \$55,421.88** will be added to the commercial lease security.

<sup>&</sup>lt;sup>1</sup> RECLAIM V8.0 Public Review- GNWT-ECC published by CIRNAC https://new.onlinereviewsystem.ca/review/CEAC05AE-EAD8-EF11-88F8-002248B1E083

Table 1: Add	Table 1: Additional Securities to be Executed for Type B Amendment:			Explanation:	Execution:	Assumptions:	
Tranche 1	Trail and Bulk Sample Construction		\$ 55,377.88	Contingency	30 days prior to start		
Tranche 2	Trail Reclamation		\$ 108,517.50	See Table 3	Upon completion of 10km of trails	Reclaim v 8.0 (Estimator)	
Tranche 3	Bulk Sample: larger than 2000, up to 5000 tonnes		\$ 55,421.88	See Table 3	>2000 tonnes taken	Reclaim v 8.0 (Estimator)	
Tranche 4	Bulk Sample: larger than 5000, up to 10,000 tonnes		\$ 55,421.88	See Table 3	>5000 tonnes taken	Reclaim v 8.0 (Estimator)	
	Total Additional Securit	ties Proposed to KIA					

We wish to thank the Kivalliq Inuit Association ("KIA") for your continued collaboration and oversight in supporting the advancement of the Ferguson Lake Project.

CNRI have spoken with the KIA and we believe that this incremental and transparent approach balances environmental protection while providing securities for responsible project advancement. We will continue to work with KIA staff and their technical advisors on the execution of securities according to the obligations of the commercial lease.

Additional details, including the reclamation plan assumptions and RECLAIM V8.0 estimate are provided in **Tables 2 to 4**.

Sincerely,

Ryan VanEngen MSc.
