Hello Christine,

In follow-up to the water use inspection report and our phone conversation, we are working on completing our 2015 Work Plan and 2014 annual Report for the Ferguson Lake Project which should be submitted by the middle of April. We apologize for the delay in getting this done. We are also working on the updated Spill Contingency Plan and Abandonment and Restoration Plan reports and the other points mentioned in the inspection report.

We are planning to open the camp in July-August this year to do inspections, sampling, maintenance and repairs (if necessary).

In answer to your question as to the coordinates of discharge point when draining water from the fuel berm; it is the same as that of the camp: **Latitude 62 deg. 53 min. 33 sec. N, Longitude 96 deg. 54 min. 05 sec.**

Specifically, it is located just adjacent to the NW corner of the fuel berm. An attached photo looking to the NW shows the fuel berm location in relation to the camp. Evidence for this location is an attached memo we retrieved for Starfield Resources which discussed the discharge of the treated waters in October 2012 and the arrow in the figure shows the location of discharge. Based upon our information, this was the last time any waters have been drained from the berm.

Canadian North Resources and Development Corp. did not drain any waters from the berm in 2013 after we had sampled and tested it during that summer because by the time the analytical results were reported indicating there was no hydrocarbon contamination, the camp had been closed up again.

In any case as required, we will provide you with 10 days notice of any plans to drain the fuel berm waters this summer while we are at the Ferguson Lake camp.

Best regards,

Trevor Boyd
Canadian North Resources and Development Corp.

Subject: WATER LICENCE INSPECTION REPORT 2BE-FER1318

Good Day Phyllis,

Please find attached an inspection report for Canadian North Resources and Development's Ferguson Lake Project.

Fee free to contact me directly if you have any question regarding this report.

Regards,

Christine
