Re: Starfield Resources Water License NWB2FER0507 Update.

Dear Phyllis:

Please find enclosed an updated Spill Plan for Starfield Resources Ferguson Lake Project and its various work sites in both hardcopy and electronic format. This Spill Plan replaces the Spill Plan that was originally submitted in February, 2005. Also included is an electronic copy of the Diamond Drill Plan Map showing the outline of this years Diamond Drilling Program. The enclosed Spill Plan is different from that recently submitted by RESCAN on Starfield's behalf. The RESCAN submittal was a revision to the Starfield's updated Spill Plan for the proposed new Starfield camp site.

In order to streamline our operations, it should be noted that RESCAN Environmental Services has assumed the roll of Environmental Consultants to Starfield Resources Ferguson Lake Project. Correspondence regarding permitting, water and/or environmental matters should be directed to both Latisha Heilman at Rescan Environmental Services and to me. Ms Heilamn's contact info is

Rescan *Engineers and Scientists*

Latisha Heilman, B.Sc.

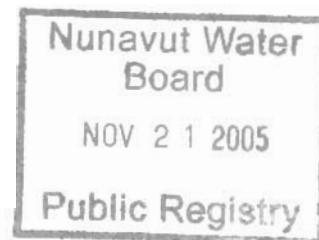

Environmental Coordinator - Licensing and
Permitting
