**WHMIS Definition and Use**

The Inquiries Service at CCOHS answers questions on the health or safety concerns people have about the work they do.

**First Aid Questions for Chemical & Materials Exposures**

1. How long should skin be rinsed in the event of accidental chemical exposure?
2. Under what circumstances should oxygen be administered as a first aid measure?
3. When should vomiting be induced following ingestion of a chemical?
4. How do I know which antidote to have available for the chemicals in my workplace?
5. How do I know which first aid procedures to follow in my workplace?

**How long should skin be rinsed in the event of accidental chemical exposure?**

The American National Standards Institute (ANSI) Standard for Emergency Eyewash and Shower Equipment (ANSI Z358.1-1998) recommends:

- Affected body part must be flushed immediately and thoroughly for at least 15 minutes using a large supply of clean fluid under low pressure. However, other references recommend a minimum 20-minute flushing period if the nature of the contaminant is not known.
- The flushing or rinsing time can be modified if the identity and properties of the chemical are known. For example, at least 5-minutes flushing time for mild irritants, 20 minutes for moderate to severe irritants, 20 minutes for non-penetrating corrosives, and minutes for penetrating corrosives.

- If irritation persists, repeat the flushing procedure.
- Non-penetrating corrosives are chemicals that react with human tissue to form a protective layer that limits the extent of damage. Most acids are non-penetrating corrosives.
- Penetrating corrosives, such as most alkali's, hydrofluoric acid and phenol, enter the skin and eyes deeply. Penetrating corrosives require longer water flushing (minimum of 60 minutes) than non-penetrating corrosives (minimum of 20 minutes).

It is important to get medical attention as soon as possible after first aid has been given. OSH Answers has more information on emergency eyewash and shower equipment.

**Under what circumstances should oxygen be administered as a first aid measure?**

- In the past, oxygen was commonly recommended as a first aid procedure for almost any chemical exposure. It is now recognized that administering oxygen can be harmful if carried out improperly or in the wrong circumstances. For example, oxygen in concentrations greater than 24% may stop breathing in victims with certain medical conditions like chronic bronchitis or emphysema.
- In addition, the presence of oxygen tanks in the workplace can introduce additional hazards.

There are, however, some situations for which the benefits of oxygen administration are unquestionable. These situations include chemical exposures that can: interfere with the ability of oxygen to cross through the lungs to the blood stream, as in pulmonary edema, a potentially fatal accumulation of fluid in the lungs.

<p><b>Some common chemicals that can cause pulmonary edema</b></p>	<ul style="list-style-type: none"> <li>• Ammonia,</li> <li>• Phosgene</li> <li>• Chlorine</li> </ul>
<p><b>Compromise the use of oxygen by body tissue</b></p>	<ul style="list-style-type: none"> <li>• Cyanide</li> <li>• Sulfide toxicity</li> </ul>
<p><b>Oxidized form of hemoglobin in the blood that does not transport oxygen</b></p>	<ul style="list-style-type: none"> <li>• Severe anemia</li> <li>• carbonmonoxide poisoning</li> <li>• methemoglobinemia</li> </ul>

In situations where administering oxygen is appropriate, first aiders must be trained in the safe, proper use and handling of oxygen. Administration of oxygen may be considered a medical act in some jurisdictions. In any case, it is preferable to administer oxygen with a doctor's supervision or advice.

### **When should vomiting be induced following ingestion of a chemical?**

It is important to note that ingestion of any chemical is not likely to occur in the workplace. Evidence and common sense indicate that inducing vomiting is not necessary in most situations where there has been an occupational chemical ingestion. Some of the arguments against inducing vomiting are:

- The amount of chemical accidentally ingested by an adult is generally estimated to be very small (0.5 to 0.75 oz. or about 14 to 21 mL).
- There is no conclusive evidence that victims of chemical ingestion who do have their stomachs emptied have more successful outcomes than victims who do not.
- There can be significant risks associated with inducing vomiting especially in emergency situations.
- There does not seem to be a reliable and safe first aid procedure for inducing vomiting in adults.
- Medical attention is usually available quite quickly in most situations.

In light of these arguments, the recommendation to induce vomiting should rarely be made for occupational exposures. In fact, induction of vomiting should only be recommended if the chemical has very high, short-term (acute) toxicity and medical follow-up is not readily available. In these cases, first aiders should receive special training on how to safely and effectively induce vomiting in the appropriate circumstances.

### **How do I know which antidote to have available for the chemicals in my workplace?**

It is a common misperception that antidotes are available for most chemical poisonings. True antidotes are the exception rather than the rule. Three commonly recommended antidotes are the "**universal antidote**", **activated charcoal**, and **milk**.

- The **universal antidote** is a mixture of tannic acid, magnesium oxide and activated charcoal. To quote one source, "There is not one iota of objective, controlled or quantitative evidence in its testimony." In other words, it does not work "universally".

- **Activated charcoal** works by binding the chemical in the stomach so it cannot be absorbed through the stomach. It is necessary to swallow up to 10 times the weight of the ingested chemical to ensure success of the antidote. This amount would be difficult to estimate and even more difficult to ingest because of the gritty, unappealing texture and taste of activated charcoal. In addition, activated charcoal can interfere with some treatments a doctor may choose to use.
- Sometimes **milk** is recommended as an antidote. It is thought that milk will slow the absorption of some chemicals through the stomach. This is true in some cases, but milk can also speed up the absorption of fat-soluble chemicals. Evaporated milk is low in fat and may be useful in some circumstances, especially ingestion of corrosives. However milk, even evaporated milk, is unlikely to be readily available in most workplaces.
- Dilution of an ingested chemical with a small amount of **water** (240-300 mL or about 8-10 oz.) is the recommended procedure for most chemical ingestions. For corrosives, dilution with a small amount of water (240-300 mL) followed by dilution with milk, if available, is the recommended procedure.
- Two chemical classes that have true antidotes are cyanides and organophosphate pesticides.
  1. **Amyl nitrate** is a cyanide antidote
  2. **Atropine** is an antidote for organophosphate pesticide poisoning.Administration of these antidotes may be considered a medical act in some jurisdictions. Appropriate training and delegation of authority should be obtained from a doctor.

#### **How do I know which first aid procedures to follow in my workplace?**

In order to know what first aid procedures to follow, it is essential that you know what chemicals are present in your workplace.

- Consult your chemical inventory and the First Aid Section on the Material Safety Data Sheets (MSDSs).
- Create a list of chemicals, their properties and their corresponding first aid requirements.

- Be sure that the emergency first aid responders in your workplace have the appropriate training and delegation of authority (if necessary) to deal with the types of chemicals used at your workplace.
- Finally, make sure your local hospital is aware of any chemicals on your site, which may require special first aid procedures or medical follow-up.

**Comet with Bleach**

***PROCTER & GAMBLE – COMET CLEANER WITH BLEACH***

**SIGNS & SYMPTOMS OF EXPOSURE**

- Ingestion: Oral ingestion may result in mild gastrointestinal irritation with nausea, vomiting or diarrhea.
- Eye Contact:
  - Prolonged skin contact or direct contact with eye may result in superficial, temporary irritation similar to those produced by other household detergents.
- Skin: Use on irritated or extremely dry skin aggravate the existing condition.
- Inhalation: N.A.

**FIRST AID**

- Ingestion: Immediately drink two large glasses of water and treat symptomatically.
- If large amounts are ingested, call a physician.
- Eye Contact: Immediately flush with large amounts of water for at least 15 minutes, lifting upper and lower lids occasionally.
- Skin: Thoroughly was exposed area with soap and water and discontinue use. Remove contaminated clothing.
- Inhalation: N.A.

- **Other:** Product package has a caution statement: CAUTION: KEEP OUT OF REACH OF CHILDREN. May cause eye irritation. In case of eye contact, flush thoroughly with water. If irritation persists, see a physician.
- If swallowed, drink a glass of water to dilute. Do not mix with other products especially toilet bowl cleansers and products that contain ammonia.

**PRODUCT MONOGRAM**

**PROCTER & GAMBLE – COMET CLEANER WITH BLEACH**

## Comet Cleaner with Chlorinoll

### PROCTER & GAMBLE – COMET CLEANER WITH CHLORINOLL

#### SIGNS & SYMPTOMS OF EXPOSURE

- Ingestion: Oral ingestion may result in gastrointestinal irritation with nausea, vomiting and diarrhea.
- Eye Contact: Prolonged skin contact or direct contact with eye may result in superficial, temporary irritation similar to those produced by other household detergents.
- Skin: Prolonged skin contact or direct contact with eye may result in superficial, temporary irritation similar to those produced by other household detergents.
- Inhalation: No hazards under normal conditions of product use or within the occupational exposure guidelines. Unusually high exposures may cause coughing or irritation of nose and throat.

#### FIRST AID

- **Emergency Telephone Number: 24hr P&G Operator - 1-513-983-1100 or call Local Poison Control Center**
- Ingestion: Dilute with fluids and treat symptomatically.
- Eye Contact: For accidental eye contact, flush thoroughly with water for 15 minutes.
- Skin: Wash with soap and water and discontinue use.
- Inhalation: For accidental, high level inhalation, remove to fresh air. Get medical attention if coughing persists.
- **Other:** Product package has a caution statement: **CAUTION: KEEP OUT OF REACH OF CHILDREN.** May cause eye irritation. In case of eye contact, flush thoroughly with water. If irritation persists, see a physician.

- 
- If swallowed, drink a glass of water to dilute. Do not mix with other products especially toilet bowl cleansers and products that contain ammonia.

**Health Hazards Data**

**(Acute and Chronic):**

Ingestion: Mild mucous membrane irritant., Eye Contact: Mild eye irritant., Inhalation: Mild respiratory irritant, Skin: Mild skin irritant.

**TOXICOLOGICAL INFORMATION**

Calcium carbonate, an ingredient of this product, contains small amounts of crystalline silica (quartz) as a naturally occurring impurity. Prolonged, excessively high exposures to respirable crystalline silica may result in reduced lung function in some individuals. IARC has found sufficient evidence to classify crystalline silica as a carcinogen in animals, but there is limited evidence in humans. LD50 (rats oral): 9 g/kg ED50: 0.23 g/kg

**Handling and Disposal**

**Environmental Precautions:** DISPOSAL IS TO BE PERFORMED IN COMPLIANCE WITH ALL FEDERAL, STATE AND LOCAL REGULATIONS. Product contains biodegradable surfactant. If permitted, flush down sewer drain with large excess of water or dispose of at landfill.

**Steps To Be Taken in Case Material is Released or Spilled:** Vacuum to remove spill and place in trash container for disposal or flush with water. Do not dry sweep.

**Precautions To Be Taken in Handling and Storing:** Avoid moisture when storing to prevent loss of bleaching action and to prevent caking.  
**Other Precautions:** None required.

**Waste Disposal Method:** Product contains biodegradable surfactant. If permitted, flush down sewer drain with large excess of water or dispose of at landfill. DISPOSAL IS TO BE PERFORMED IN COMPLIANCE WITH FEDERAL, STATE AND LOCAL REGULATIONS.

**TRANSPORT INFORMATION DOT Classification:** Comet cleanser is not DOT hazardous, and is not regulated under the DOT Hazardous Material Regulations (49 CFR, parts 171-180) which govern the sale and transport of hazardous materials.

**Fire and Explosion Hazard Information**

**Flash Point (Method Used):** N/A **Explosive Limits:** LEL: N/A UEL: N/A **Extinguishing Media:** Use CO2, water, or dry chemical. **Special Fire Fighting Procedures:** None required. **Unusual Fire Hazards:** None known. **Stability** Unstable: Stable: X **Conditions to Avoid:** None known **Incompatibility (Materials to Avoid):** Ammonia and acids. **Hazardous Decomposition/By Products:** Chlorine gas. **Hazardous Polymerization:** May Occur:  
**Will Not Occur:** X **Conditions to Avoid:** None known

**Control Measures**

**EXPOSURE CONTROLS, PERSONAL PROTECTION**

**Respiratory Protection (Specify Type):** None required with normal use. For bulk handling or other dusty conditions, use respiratory protection approved by NIOSH for dust. **Ventilation** Local Exhaust: None required with normal consumer use. **Special:** None **Mechanical (General):** Acceptable. **Other:** None

**Eye Protection:** None required with normal consumer use. **Industrial Setting:** For splash protection, use chemical goggles.

**Protective Gloves:** None required with normal use. **Other Protective Equipment:** None required with normal use.

**Mechanical (General):** Acceptable. **Other:** None **Eye Protection:** None required with normal use. **Industrial Setting:** For splash protection, use chemical goggles.  
Eye wash fountain is desirable. **Protective Gloves:** None required with normal use. **Other Protective Equipment:** None required with normal use.

## Oven Cleaner

RECKITT & COLMAN INC -- EASY-OFF FUME FREE OVEN CLEANER (AEROSOL)

### SIGNS & SYMPTOMS OF EXPOSURE

- ACUTE: MAY CAUSE TRANSIENT EYE DISCOMFORT. CHRONIC: THE PRODUCT HAS NOT BEEN TESTED AS A WHOLE FOR CHRONIC EFFECTS.
- Explanation Of Carcinogenicity: NOT RELEVANT.
- Signs And Symptoms Of Overexposure: SEE HEALTH HAZARDS.
- Medical Cond Aggravated By Exposure: NONE KNOWN.

### FIRST AID

- THERE IS NO SPECIFIC ANTIDOTE. EYES: FLUSH WITH POTABLE WATER FOR AT LEAST 15 MINUTES. SEE MD (FP N).
- SKIN: TREATMENT OF OVEREXPOSURE SHOULD BE DIRECTED AT THE CONTROL OF SYMPTOMS AND THE CLINICAL CONDITION. FLUSH WITH COPIOUS AMOUNTS OF WATER. SEE MD (FP N).
- INHALATION: REMOVE TO FRESH AIR. SUPPORT BREATHING (GIVE OXYGEN OR ARTIFICIAL RESPIRATION) (FP N).
- INGESTION: CALL MD IMMEDIATELY (FP N)
- Emergency Phone Number: 800-424-9300 (CHEMTREC).

475F. DO NOT SPRAY ONTO PILOT LIGHT, ELEC CONNECTIONS SWITCHES, LIGHT BULBS, HEATING ELEMENTS, THERMOSTATS.

## Light Distillate

### LIGHT DISTILLATE IMPERIAL OIL

#### SIGNS & SYMPTOMS OF EXPOSURE INHALATION

- Negligible hazard at normal temperatures (up to 38 deg C), High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects. Avoid breathing vapours or mists

#### EYE CONTACT

- Slightly irritating, but will not injure eye tissue

#### SKIN CONTACT:

- Low toxicity, irritating

#### INGESTION:

- Low toxicity. Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema).

**FIRST AID Emergency 24 hr. (519) 339-2145 IMPERIAL OIL**

#### INHALATION

- In emergency situations use proper respiratory protection to immediately remove the affected victim from exposure. administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention.

#### EYE CONTACT:

- Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention.

**SKIN CONTACT**

- Immediately flush with large amounts of water. Use soap if available. Remove contaminated clothing, including shoes, after flushing has begun. If irritation persists, seek medical attention

**INGESTION:**

- **DO NOT** induce vomiting since it is important that no amount of the material should enter the lungs (aspiration). Keep at rest. Get prompt medical attention.

Light Atmospheric Gas Oil 0-100 VV 64741-44-2

Light Hydrocracked Distillate 0-100 VV 64741-77-1

**Health Hazards Data**

**INHALATION** Negligible hazard at normal temperatures (up to 38 deg C), High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects. Avoid breathing vapours or mists **EYE CONTACT** Slightly irritating, but will not injure eye tissue **SKIN CONTACT:** Low toxicity .Irritating **INGESTION:** Low toxicity. Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema). **CHRONIC:** Lifetime skin painting tests indicate that materials of similar composition have produced skin cancer in experimental animals. The relationship of these results to humans has not been fully established.

**ACUTE TOXICITY DATA:**

Based on animal testing data from similar materials and products, the acute toxicity of this product is expected to be: Oral: LD50 > 5000 mg/kg (Rat)

Dermal LD50 > 2000 mg/kg (Rabbit) Inhalation LC50 > 2500 mg/m3 (Rat)

**OCCUPATIONAL EXPOSURE LIMIT Manufacturer recommends:** 100 ppm based on composition. Local regulated limits may vary.

### ***Handling and Disposal***

#### **TDG INFORMATION (RAIL/ROAD)**

Keep containers closed. Handle and open containers with care. Store in a cool, well ventilated place away from incompatible materials. In keeping with good personal hygiene practices, wash hands thoroughly after handling the material. Do not handle or store near an open flame, sources of heat, or sources of ignition.

Material will accumulate static charges which may cause a spark. Static charge build-up could become an ignition source. Use proper relaxation and grounding procedures. Empty containers may contain product residue. Do not pressurize cut, heat, or weld empty containers. Do not reuse empty containers without commercial cleaning or reconditioning.

**LAND SPILL:** Eliminate source of ignition. Keep public away. Prevent additional discharge of material, if possible to do so without hazard. Prevent spills from entering sewers, watercourses or low areas. Contain spilled liquid with sand or earth. Do not use combustible materials such as sawdust. Recover by pumping (use an explosion proof motor or hand pump), or by using a suitable absorbent. Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

**WATER SPILL:** Remove from surface by skimming or with suitable absorbents. If allowed by local authorities and environmental agencies, sinking and/or suitable dispersants may be used in unconfined waters. Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

### ***Fire and Explosion Hazard Information***

WHMIS Class B, Division 3: Combustible Liquids

Class D, Division 2, Subdivision B: Toxic Material

Flashpoint and method: 40 deg C PMCC ASTM D93

Autoignition: NA Flammable Limits: LEL: NA UEL: NA

#### **GENERAL HAZARDS**

Combustible Liquid; may form combustible mixtures at or above the flash point. Toxic gases will form upon combustion. Static Discharge; material may accumulate static charges which may cause a fire.

#### **FIRE FIGHTING:**

Use water spray to cool fire exposed surfaces and to protect personnel. Shut off fuel to fire. Use foam, dry chemical or water spray to extinguish fire. Respiratory and eye protection required for fire fighting personnel. Avoid spraying water directly into storage containers due to danger of boilover. A self-contained breathing apparatus (SCBA) should be used for all indoor fires and any significant outdoor fires. For small outdoor fires, which may easily be extinguished with a portable fire extinguisher, use of an SCBA may not be required.

#### **HAZARDOUS COMBUSTION PRODUCTS**

Smoke, carbon monoxide, carbon dioxide, oxides of sulphur. In addition, small amounts of nitrogen oxides will be formed

#### **REACTIVITY DATA**

#### **STABILITY**

This product is stable. Hazardous polymerization will not occur.

#### **INCOMPATIBLE MATERIALS AND CONDITIONS TO AVOID**

Strong oxidizing agents. Use product with caution around heat, sparks, pilo lights, static electricity and open flames

#### **HAZARDOUS DECOMPOSITION**

none

#### **NOTES**

All components of this product are listed on the U.S. TSCA inventory

**Control Measures**

The selection of personal protective equipment varies, depending upon conditions of use. In open systems where contact is likely, wear safety goggles, chemical-resistant overalls, and chemically impervious gloves. Where only incidental contact is likely, wear safety goggles, long sleeves, and chemical-resistant gloves.

Where concentrations in air may exceed the occupational exposure limits given in Section 4 and where engineering, work practices or other means of exposure reduction are not adequate, approved respirators may be necessary to prevent overexposure by inhalation.

**ENGINEERING CONTROLS:**

The use of local exhaust ventilation is recommended to control emissions near the source. Laboratory samples should be handled in a fumehood. Provide mechanical ventilation of confined spaces.

## Middle Distillate

### IMPERIAL OIL - MIDDLE DISTILLATE

#### SIGNS & SYMPTOMS OF EXPOSURE

- High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects
- Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema).

#### FIRST AID

#### INHALATION:

- In emergency situations use proper respiratory protection to immediately remove the affected victim from exposure. Administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention.

#### EYE CONTACT:

- Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention.

#### SKIN CONTACT:

- Immediately flush with large amounts of water. Use soap if available. Remove contaminated clothing, including shoes, after flushing has begun. If irritation persists, seek medical attention.

#### INGESTION:

- DO NOT induce vomiting since it is important that no amount of the material should enter the lungs (aspiration). Keep at rest. Get prompt medical attention.

## Gas-Unleaded

### IMPERIAL OIL: GAS - UNLEADED

#### SIGNS & SYMPTOMS OF EXPOSURE

- **INHALATION:** High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects
- **SKIN CONTACT** Low toxicity. Frequent or prolonged contact may irritate the skin and cause a skin rash (dermatitis).
- **INGESTION:** Low toxicity. Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema).

#### FIRST AID

##### Emergency 24 hr. (519) 339-2145 IMPERIAL OIL

#### INHALATION:

- In emergency situations use proper respiratory protection to immediately remove the affected victim from exposure. Administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention.

#### EYE CONTACT:

- Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention.

#### SKIN CONTACT:

- Flush with large amounts of water. Use soap if available. Remove severely contaminated clothing (including shoes) and launder before reuse. If irritation persists, seek medical attention.

**INGESTION:**

- DO NOT induce vomiting since it is important that no amount of the material should enter the lungs (aspiration). Keep at rest. Get prompt medical attention.

High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects. Avoid breathing vapours or mists.

**EYE CONTACT:**

Slightly irritating, but will not injure eye tissue. **SKIN CONTACT:** Low toxicity. Frequent or prolonged contact may irritate the skin and cause a skin rash (dermatitis).

**INGESTION:** Low toxicity. Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema).  
**CHRONIC:**

The International Agency for Research on Cancer (IARC) has evaluated gasoline and found it to be a possible human carcinogen. Contains benzene. Human health studies (epidemiology) indicate that prolonged and/or repeated overexposures to benzene may cause damage to the blood producing system and serious blood disorders, including leukemia. Animal tests suggest that prolonged and/or repeated overexposures to benzene may damage the embryo/fetus. The relationship of these animal studies to humans has not been fully established. Contains n-hexane. Prolonged and/or repeated exposures may cause damage to the peripheral nervous system (e.g. fingers, feet, arms etc.). Methyl Tertiary Butyl Ether (MTBE) was tested for carcinogenicity, neurotoxicity, chronic, reproductive and developmental toxicity. The NOEL for all endpoints evaluated in three animal species was 400 ppm or greater. An increase in kidney tumors/damage and liver tumors was observed in animals exposed to high concentrations of MTBE. Some embryo/fetal toxicity and birth defects were observed in the offspring of pregnant mice exposed to maternally toxic doses of MTBE, however the offspring of exposed pregnant rabbits were unaffected. The significance of the animal findings at high exposures are not believed to be directly related to potential human health hazards in the workplace.

**ACUTE TOXICITY DATA:**

Based on animal testing data from similar materials and products, the acute toxicity of this product is expected to be: Oral : LD50 > 18 ml/kg (Rat)

Dermal : LD50 > 5 ml/kg (Rabbit)

**OCCUPATIONAL EXPOSURE LIMIT:**

Manufacturer recommends: For Benzene (skin) 1 ppm TWA for 8 hour workday. For gasoline, 300 mg/m<sup>3</sup>. For Methyl-tert-Butyl Ether, 25 ppm (90 mg/m<sup>3</sup>) 8-hour TWA and 75 ppm (270 mg/m<sup>3</sup>) 15-minute STEL. ACGIH recommends: For Gasoline, ACGIH recommends a TWA of 300 ppm (890 mg/m<sup>3</sup>) and categorizes it as an animal carcinogen. For n-Hexane (skin), 50 ppm (176 mg/m<sup>3</sup>). For Benzene, ACGIH recommends a TWA of 0.5 ppm (1.6 mg/m<sup>3</sup>), (skin), and categorizes it as a confirmed human carcinogen. For Methyl-tert-Butyl Ether, ACGIH recommends a TLV of 40 ppm (144 mg/m<sup>3</sup>) and categorizes it as an animal carcinogen. Local regulated limits may vary.

**STARFIELD** RESOURCES INC.

**STARFIELD** RESOURCES INC.

**Handling and Disposal  
DG INFORMATION (RAIL/ROAD):**

Shipping Name: Gasoline

Class: 3

Packing Group: II

PIN Number: UN1203

Keep containers closed. Handle and open containers with care. In keeping with good personal hygiene practices, wash hands thoroughly after handling the material. Store and load at normal (up to 38 deg C) temperature and at atmospheric pressure. Material will accumulate static charges which may cause a spark. Static charge build-up could become an ignition source. Use proper relaxation and grounding procedures. For personnel entry into confined spaces (i.e. bulk storage tanks) a proper confined space entry procedure must be followed including ventilation and testing of tank atmosphere. Empty containers may contain product residue. Do not pressurize cut, heat, or weld empty containers. Do not reuse empty containers without commercial cleaning or reconditioning.

**LAND SPILL:**

Eliminate source of ignition. Keep public away. Prevent additional discharge of material, if possible to do so without hazard. Vapours or dust may be harmful or fatal. Warn occupants of downwind areas. Prevent spills from entering sewers, watercourses or low areas. Contain spilled liquid with sand or earth. Do not use combustible materials such as sawdust. Recover by pumping (use an explosion proof motor or hand pump), or by using a suitable absorbent. Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

**WATER SPILL:**

Eliminate all sources of ignition. Vapours or dust may be harmful or fatal. Warn occupants and shipping in downwind areas. Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

**Fire and Explosion Hazard Information**

Flashpoint and method: -40 deg C COC D92 less than/moins de Autoignition: NA Flammable Limits: LEL: 1.4% UEL: 7.6%

**GENERAL HAZARDS:**

Extremely flammable; material will readily ignite at normal temperatures. Flammable Liquid; may release vapours that form flammable mixtures at or above the flash point. Toxic gases will form upon combustion. Static Discharge; material may accumulate static charges which may cause a fire.

**FIRE FIGHTING:**

Use water spray to cool fire exposed surfaces and to protect personnel. Shut off fuel to fire if possible to do so without hazard. If a leak or spill has not ignited use water spray to disperse the vapours. Either allow fire to burn out under controlled conditions or extinguish with foam or dry chemical. Try to cover liquid spills with foam. Respiratory and eye protection required for fire fighting personnel. Avoid spraying water directly into storage containers due to danger of boilover.

A self-contained breathing apparatus (SCBA) should be used for all indoor fires and any significant outdoor fires. For small outdoor fires, which may easily be extinguished with a portable fire extinguisher, use of an SCBA may not be required.

**HAZARDOUS COMBUSTION PRODUCTS:**

Smoke, carbon monoxide, carbon dioxide under thermal decomposition.

**REACTIVITY DATA**

**STABILITY:** This product is stable. Hazardous polymerization will not occur.

**INCOMPATIBLE MATERIALS AND CONDITIONS TO AVOID:** Strong oxidizing agents

**HAZARDOUS DECOMPOSITION:**

none

**PERSONAL PROTECTION:**

The selection of personal protective equipment varies, depending upon conditions of use. In open systems where contact is likely, wear safety goggles, chemical-resistant overalls, and chemically impervious gloves. Where only incidental contact is likely, wear safety glasses with side shields. No other special precautions are necessary provided skin/eye contact is avoided. Where concentrations in air may exceed the occupational exposure limits given in Section 4 and where engineering, work practices or other means of exposure reduction are not adequate, approved respirators may be necessary to prevent overexposure by inhalation.

**ENGINEERING CONTROLS:**

The use of local exhaust ventilation is recommended to control emissions near the source. Laboratory samples should be handled in a fumehood. Provide mechanical ventilation of confined spaces. Use explosion-proof ventilation equipment.

## Heating Oil

### IMPERIAL OIL: HEATING OIL

#### SIGNS & SYMPTOMS OF EXPOSURE

- **INHALATION:** Negligible hazard at normal temperatures (up to 38 deg C). High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects. Avoid breathing vapours or mists.
- **EYE CONTACT:** Slightly irritating, but will not injure eye tissue.
- **SKIN CONTACT:** Low toxicity. Irritating.
- **INGESTION:** Low toxicity. Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema).

#### FIRST AID

##### Emergency 24 hr. (519) 339-2145 IMPERIAL OIL

- **INHALATION:** In emergency situations use proper respiratory protection to immediately remove the affected victim from exposure. Administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention.
- **EYE CONTACT:** Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention.

- **SKIN CONTACT:** Immediately flush with large amounts of water. Use soap if available. Remove contaminated clothing, including shoes, after flushing has begun. If irritation persists, seek medical attention.
- **INGESTION:** DO NOT induce vomiting since it is important that no amount of the material should enter the lungs (aspiration). Keep at rest. Get prompt medical attention.

**PRODUCT MONOGRAM**

**IMPERIAL OIL: HEATING OIL**

**MSDS Safety Information**

## Propane (Odorized)

### IMPERIAL OIL: COMMERCIAL PROPANE (ODORIZED)

#### SIGNS & SYMPTOMS OF EXPOSURE

- **INHALATION:** May cause central nervous system disorder (e.g. loss of coordination, weakness, fatigue, mental confusion and blurred vision) and/or damage. Breathing high vapour concentrations (saturated vapours) for a few minutes may be fatal. Saturated vapours can be encountered in confined spaces and/or under conditions of poor ventilation. May cause irritation, breathing failure, coma and death without any warning odour being sensed. Inhalation exposure to this product at extremely high concentrations, as in accidental releases in which concentrations reach or exceed the flammable range, may result in cardiac arrhythmias.
- **EYE CONTACT:** Exposure to rapidly expanding gas or vapourizing liquid may cause frostbite (cold burns) and permanent eye damage.
- **SKIN CONTACT:** Exposure to rapidly expanding gas or vapourizing liquid may cause frostbite (cold burn).

#### FIRST AID

- **Emergency 24 hr. (519) 339-2145 IMPERIAL OIL**
- **Technical Info. (800) 268-3183 Products Division**
- **INHALATION:** In emergency situations use proper respiratory protection to immediately remove the affected victim from exposure. Administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention.

- 
- **EYE CONTACT:** In case of cold burns caused by rapidly expanding gas or vapourizing liquid, get prompt medical attention.
  - **SKIN CONTACT:** In case of cold burns caused by rapidly expanding gas or vapourizing Liquid, get prompt medical attention.
  - **INGESTION:** First aid is not applicable.

**PRODUCT MONOGRAM**

**IMPERIAL OIL: COMMERCIAL PROPANE (ODORIZED)**

**MSDS Safety Information**

MSDS Number: 08515

**CAUTION:** " The information contained herein relates only to this product or material and may not be valid when used in combination with any other product or material or in any process. If the product is not to be used for a purpose or under conditions which are normal or reasonably foreseeable, this information cannot be relied upon as complete or applicable. For greater certainty, uses other than those described in Section 1 must be reviewed with the supplier. The information contained herein is based on the information available at the indicated date of preparation. This MSDS is for the use of Imperial Oil customers and their employees and agents only. Any further distribution of this MSDS by Imperial Oil customers is prohibited without the written consent of Imperial Oil."

**WHMIS:**

Class A - Compressed Gas

Class B, Division 1: Flammable Gases.

**Ingredients**

Colourless gases composed mainly of C3 hydrocarbons stored and handled as liquids under pressure.

leaks.

**STARFIELD** RESOURCES INC.

**Health Hazards Data**

**INHALATION:** May cause central nervous system disorder (e.g. loss of coordination, weakness, fatigue, mental confusion and blurred vision) and/or damage.

Breathing high vapour concentrations (saturated vapours) for a few minutes may be fatal. Saturated vapours can be encountered in confined spaces and/or under conditions of poor ventilation. May cause irritation, breathing failure, coma and death without any warning odour being sensed. Inhalation exposure to this product at extremely high concentrations, as in accidental releases in which concentrations reach or exceed the flammable range, may result in cardiac arrhythmias.

**EYE CONTACT:** Exposure to rapidly expanding gas or vapourizing liquid may cause frostbite (cold burns) and permanent eye damage.

**SKIN CONTACT:** Exposure to rapidly expanding gas or vapourizing liquid may cause frostbite (cold burn).

**INGESTION:** Not considered to be a hazard.

**ACUTE TOXICITY DATA:** The above evaluation of hazard is based on knowledge of the toxicity of the material's components.

**OCCUPATIONAL EXPOSURE LIMIT:** Manufacturer recommends: For Isobutane, 800 ppm. For Propane, 1000 ppm TWA for 8 hours/day, and 1500 ppm for a 15 minute short term exposure (STEL). For propylene, 1000 ppm 8-hour TWA and 3000 ppm 15-minute STEL.ACGIH recommends: For Butane, 800 ppm (1900 mg/m3). Local regulated limits may vary.

**Handling and Disposal**

**HANDLING, STORAGE AND SHIPPING:**

Keep containers closed. Handle and open containers with care. Store in a cool, well ventilated place away from incompatible materials. Store as pressurized liquid in a pressure vessel. Store and load the container at normal (up to 38 deg C) temperature and at atmospheric pressure. Material will accumulate static charges which may cause a spark. Static charge build-up could become an ignition source. Use proper relaxation and grounding procedures. Empty containers may contain product residue. Do not pressurize cut, heat, or weld empty containers. Do not reuse empty containers without commercial cleaning or reconditioning.

**LAND SPILL:**

Eliminate source of ignition. Keep public away. Prevent additional discharge of material, if possible to do so without hazard. Vapours or dust may be harmful or fatal. Warn occupants of downwind areas. Allow to evaporate. Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

**WATER SPILL:**

Eliminate all sources of ignition. Vapours or dust may be harmful or fatal. Warn occupants and shipping in downwind areas. Allow to evaporate from surface. Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

**Fire and Explosion Hazard Information**

Flashpoint and method: -103 deg C COC ASTM D92 Autoignition: 432 deg C Flammable Limits: LEL: 2.4% UEL: 9.5% GENERAL HAZARDS: Extremely flammable; material will readily ignite at normal temperatures. Flammable Gas; may readily form flammable mixtures at or above the flash point. Toxic gases will form upon combustion. Static Discharge; material may accumulate static charges which may cause a fire. Auto-refrigeration; drains may become plugged and valves may become inoperable because of the formation of ice due to expanding vapours or vapourizing liquids. FIRE FIGHTING: Use water spray to cool fire exposed surfaces and to protect personnel. Shut off fuel to fire if possible to do so without hazard. If a leak or spill has not ignited use water spray to disperse the vapours. Do not extinguish flames at leak because possibility of uncontrolled explosive re-ignition exists. Cut off fuel and/or allow fire to burn out. Extinguish small residual fires with dry chemical powder or water spray. Try to cover liquid spills with foam. Respiratory and eye protection required for fire fighting personnel. A self-contained breathing apparatus (SCBA) should be used for all indoor fires and any significant outdoor fires. For small outdoor fires, which may easily be extinguished with a portable fire extinguisher, use of an SCBA may not be required. HAZARDOUS COMBUSTION PRODUCTS: Smoke, carbon monoxide, carbon dioxide under thermal decomposition. REACTIVITY DATA STABILITY: This product is stable. Hazardous polymerization will not occur. INCOMPATIBLE MATERIALS AND CONDITIONS TO AVOID: Strong oxidizing agents

**Control Measures PERSONAL PROTECTION:** The selection of personal protective equipment varies, depending upon conditions of use. In open systems where contact is likely, wear gas-proof goggles, face shield chemical-resistant overalls, and appropriate thermal/chemical gloves. Where skin and eye contact is unlikely, but may occur as a result of short and/or periodic exposures, wear long sleeves, chemical resistant gloves, gas-proof goggles, and a face shield. Where concentrations in air may exceed the occupational exposure limits given in Section 4 and where engineering, work practices or other means of exposure reduction are not adequate, approved respirators may be necessary to prevent overexposure by inhalation. **ENGINEERING CONTROLS:** The use of local exhaust ventilation is recommended to control emissions near the source. Laboratory samples should be handled in a fumehood. Provide mechanical ventilation of confined spaces. Use explosion-proof ventilation equipment.

**NOTES** All components of this product are listed on the U.S. TSCA inventory. Imperial Oil has no knowledge how its customers will handle, store, transfer, distribute or use odourized propane or non-odourized propane and therefore makes no warranty regarding the propane or the odourant after the custody of these materials passes to the customers. It is recommended that Imperial Oil's customers provide their employees and subsequent customers with information regarding the characteristics of propane, how those characteristics relate to the employees or customers use including the limitation in detecting non-odourized or odourized propane and the limitations of any odourant such as ethyl mercaptan that may be added during subsequent distribution. With proper handling, transportation and storage, adding a chemical odourant such as ethyl mercaptan has proven to be a very effective warning device but all odourants have certain limitations. The effectiveness of the odourant may be diminished by a person's sense of smell, by competing odours and by oxidation which may cause a potentially dangerous situation. Further safety related information is contained on the Material Safety Data Sheet. Industry experience has shown that natural gas streams may contain trace amounts of radon, a naturally occurring radioactive gas, and radioactive particulate decay products which can accumulate in process equipment and storage vessels. These materials emit gamma, alpha, and beta forms of radiation. Since gamma radiation can penetrate the walls of intact equipmenta potential for exposure could exist at or adjacent to the external surface of process equipment that contain radon-enriched process streams or accumulated deposits of radon decay products. Equipment emitting gamma radiation at dose rates above background should be assumed to be contaminated with internal deposits of alpha- and beta-emitting radon decay products. Measures should be taken to preclude the inhalation or ingestion of alpha- Of beta-emitting materials. Before performing maintenance on contaminated equipment, all process shut-down safety and "gas freeing" procedures should be followed and at least a 4 hour lapse should be allowed between process stream shut-down and the opening of equipment for repair operations. This time will allow the gamma radiation dose rates to be reduced to background levels. Maintenance personnel should wear appropriate personal protective equipment and follow recommended industrial hygiene/safety and environmental procedures in accordance with prevailing regulations and industry guidelines

## Oxygen

### NON-FLAMMABLE GAS MIXTURE (OXYGEN)

#### SIGNS & SYMPTOMS OF EXPOSURE

Individuals breathing such an atmosphere may experience symptoms that include: nausea, dizziness, bronchial irritation, hypothermia, increased depth of respiration, bradycardia, pulmonary discomfort, peripheral vasoconstriction, amblyopia (loss of vision), seizures, or death.

Contact with rapidly expanding gases (which are released under high pressure) may cause frostbite. Symptoms of frostbite include change in skin color to white or grayish-yellow

#### FIRST AID

**EMERGENCY PHONE: CHEMTREC: 1-800-424-9300 International: 202-483-7616**

- Remove victim(s) to fresh air, as quickly as possible. In case of eye contact that leads to irritation, immediately flush eyes with copious amounts of water for at least 15 minutes.
- If not breathing, give artificial respiration.
- If breathing is difficult, give oxygen. Only trained personnel should administer supplemental oxygen.
- In case of frostbite, place the frostbitten part in warm water. **DO NOT USE HOT WATER.** If warm water is not available, or is impractical to use, wrap the affected parts gently in blankets. Alternatively, if the fingers or hands are frostbitten, place the affected area in the armpit. Encourage victim to gently exercise the affected part while being warmed. Seek immediate medical attention.
- Victim(s) must be taken for medical attention. Rescuers should be taken for medical attention, if necessary. Take copy

---

of label and MSDS to physician or other health professional with victim(s).

**PRODUCT MONOGRAM**

**NON-FLAMMABLE GAS MIXTURE (OXYGEN)**

**Contractor Summary**

**SUPPLIER/MANUFACTURER'S NAME:** AIRGAS INC. **ADDRESS:** 259 Radnor-Chester Road Suite 100 Radnor, PA 19087-5240

**EMERGENCY PHONE:** CHEMTREC: 1-800-424-9300 **International:** 202-483-7616 **BUSINESS PHONE:** 1-610-687-5253

**MSDS Safety Information**

**CAS #:** This is the Chemical Abstract Service Number that uniquely identifies each constituent. It is used for computer-related searching. **EXPOSURE LIMITS IN AIR:** ACGIH - American Conference of Governmental Industrial Hygienists, a professional association which establishes exposure limits. TLV - Threshold Limit Value - an airborne concentration of a substance which represents conditions under which it is generally believed that nearly all workers may be repeatedly exposed without adverse effect. The duration must be considered, including the 8-hour Time Weighted Average (TWA), the 15-minute Short Term Exposure Limit, and the instantaneous Ceiling Level. Skin adsorption effects must also be considered. OSHA - U.S. Occupational Safety and Health Administration. PEL - Permissible Exposure Limit - this exposure value means exactly the same as a TLV, except that it is enforceable by OSHA. The OSHA Permissible Exposure Limits are based in the 1989 PELs and the June, 1993 Air Contaminants Rule (Federal Register: 58: 35338-35351 and 58: 40191). Both the current PELs and the vacated PELs are indicated. The phrase, "Vacated 1989 PEL," is placed next to the PEL which was vacated by Court Order. IDLH - Immediately Dangerous to Life and Health level represents a concentration from which one can escape within 30- minutes without suffering escape-preventing or permanent injury. The DFG - MAK is the Republic of Germany's Maximum Exposure Level, similar to the U.S. PEL. NIOSH is the National Institute of Occupational Safety and Health, which is the research arm of the U.S. Occupational Safety and Health Administration (OSHA). NIOSH issues exposure guidelines called Recommended Exposure Levels (RELs). When no exposure guidelines are established, an entry of NE is made for reference.

**FLAMMABILITY LIMITS IN AIR:** Much of the information related to fire and explosion is derived from the National Fire Protection Association (NFPA). LEL - the lowest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source. UEL - the highest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source.

**TOXICOLOGICAL INFORMATION** Possible health hazards as derived from human data, animal studies, or from the results of studies with similar compounds are presented. Definitions of some terms used in this section are: LD50- Lethal Dose (solids & liquids) which kills 50% of the exposed animals; LC50 - Lethal Concentration (gases) which kills 50% of the exposed animals; ppm concentration expressed in parts of material per million parts of air or water; mg/m<sup>3</sup> concentration expressed in weight of substance per volume of air; mg/kg quantity of material, by weight, administered to a test subject, based on their body weight in kg. Data from several sources are used to evaluate the cancercausing potential of the material. The sources are: IARC – the International Agency for Research on Cancer; NTP - the National Toxicology Program, RTECS - the Registry of Toxic Effects of Chemical Substances, OSHA and CAL/OSHA. IARC and NTP rate chemicals on a scale of decreasing potential to cause human cancer with rankings from 1 to 4. Subrankings (2A, 2B, etc.) are also used. Other measures of toxicity include TDLo, the lowest dose to cause asymptom and TCLo the lowest concentration to cause a symptom; TDo, LDLo, and LDo, or TC, TCo, LCLo, and LCo, the lowest dose (or concentration) to cause death. BEI - Biological Exposure Indices, represent the levels of determinants that are most likely to be observed in specimens collected from a healthy worker who has been exposed to chemicals to the same extent as a worker with inhalation exposure to the TLV. **REGULATORY INFORMATION**

This section explains the impact of various laws and regulations on the material. The acronyms used are: EPA is the U.S. Environmental Protection Agency. WHMIS is the Canadian Workplace Hazardous Materials Information System. DOT and TC are the U.S. Department of Transportation and Transport Canada, respectively. Superfund Amendments and Reauthorization Act (SARA); the Toxic Substance Control Act (TSCA); Marine Pollutant status according to the DOT; California's Safe Drinking Water Act (Proposition 65); the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund); and various state regulations

**Health Hazards Data**

**EMERGENCY OVERVIEW:** This product is a colorless, odorless gas. High concentrations of this gas can cause an oxygen-rich environment, breathing such an atmosphere may cause symptoms which can include nausea, dizziness, or death. High concentrations of Carbon Dioxide (a component of this gas mixture) can cause nausea, dizziness, headache, mental confusion, increased blood pressure and respiratory rate. If the concentration of Carbon Dioxide reaches 10% or more suffocation can occur within minutes. At high concentrations of this gas. Additionally, frostbite can occur if skin or other tissues are exposed to rapidly expanding gases. Although this gas mixture is non-flammable, Oxygen, a component of this product, is an oxidizing agent and accelerates combustion. Atmospheres containing greater than 23.5% Oxygen present a significant fire hazard by lowering the flashpoint of flammable and combustible materials in the surrounding area. Emergency responders must wear proper personal protective equipment, including Self-Contained Breathing Apparatus, when responding to releases of this material. **INHALATION:** High concentrations of this gas can cause an oxygen rich environment. Individuals breathing such an atmosphere may

experience symptoms which include nausea, dizziness, bronchial irritation, hypothermia, increased depth of respiration, bradycardia, pulmonary discomfort, peripheral vasoconstriction, amblyopia (loss of vision), seizures, or death. Additionally, if the concentration of Carbon Dioxide (a component of this gas mixture) reaches 10% or more, suffocation can occur within minutes. At concentrations between 2-10%, Carbon Dioxide can cause nausea, dizziness, headache, mental

confusion, increased blood pressure and respiratory rate. **CONTACT WITH SKIN or EYES:** High concentrations of Carbon Dioxide can react with moisture in the air which could lead to the formation of carbonic acid, which can be irritating to the eyes. **OTHER POTENTIAL HEALTH EFFECTS:** Contact with rapidly

expanding gases (which are released under high pressure) may cause frostbite. Symptoms of frostbite include change in skin color to white or grayish-yellow. The pain after contact with liquid can quickly subside. **HEALTH EFFECTS OR RISKS FROM EXPOSURE:** An Explanation in Lay Terms. Over-exposure to this gas mixture may cause the following health effects: **ACUTE:** High concentrations of this gas can cause an oxygen-rich environment. Individuals breathing such an atmosphere may experience symptoms which include nausea, dizziness, bronchial irritation, hypothermia, increased depth of respiration, bradycardia, pulmonary discomfort, peripheral vasoconstriction, amblyopia (loss of vision), seizures, or death. Contact with rapidly expanding gases (which are released under high pressure) may cause frostbite. Symptoms of frostbite include change in skin color to white or grayish-yellow. The pain after contact with liquid can quickly subside. **CHRONIC:** There are currently no known adverse health effects associated with chronic exposure to this product. **PART II What should I do if a hazardous situation occurs? STABILITY:** Normally stable. **TOXICOLOGICAL INFORMATION TOXICITY DATA:** The following data are for the components of this gas mixture. **OXYGEN:** Cytogenic Analysis System (hamster, lung) = 80 pph/14 hours, pulmonary effects. **CARBON DIOXIDE:** This gas is an asphyxiant gas with physiological effects at

TCLo (inhalation, human) = 100 pph/ 14 hours, pulmonary effects. **CARBON DIOXIDE:** This gas is an asphyxiant gas with physiological effects at high concentrations. LCLo (inhalation, human) = 9pph/5 minutes. LCLo (inhalation, mammal) = 90,000 ppm/5 minutes. TCLo (inhalation, rat) = 6pph/24 hours; reproductive and teratogenic effects. **SUSPECTED CANCER AGENT:** The components of this gas mixture are not found on the following lists: **FEDERAL OSHA Z LIST, NTP, CAL/OSHA, IARC,** and therefore are not considered to be, nor suspected to be, cancer-causing agents by these agencies. **IRRITANCY OF PRODUCT:** Contact with rapidly expanding gases can cause frostbite and damage to exposed skin and eyes.

**SENSITIZATION OF PRODUCT:** The components of this gas mixture are not sensitizers. **REPRODUCTIVE TOXICITY INFORMATION:** Listed below is information concerning the effects of this product and its components on the human reproductive system. **Mutagenicity:** This product is not expected to cause mutagenic effects in humans. Human mutation data are available for Oxygen (a component of this product) obtained during clinical studies on specific human tissues exposed to high doses of this compound.

**Embryotoxicity:** This product is not expected to cause embryotoxic effects. **Teratogenicity:** This product is not expected to cause teratogenic effects in humans.

State regulations:

Alaska - Designated Toxic and Hazardous Substances: Carbon Dioxide. California - Permissible Exposure Limits for Chemical Contaminants: Carbon Dioxide.

Additionally, AIRGAS, Inc. assumes no responsibility for injury to vendee or third persons proximately caused by abnormal use of the material even if reasonable safety procedures are followed. Furthermore, vendee assumes the risk in his use of the material. NON-FLAMMABLE GAS MIXTURE MSDS

**Control Measures**

in Section 6 (Accidental Release Measures). Make certain application equipment is locked and tagged-out safely. Always use product in areas where adequate ventilation is provided.

**EXPOSURE CONTROLS - PERSONAL PROTECTION**

**VENTILATION AND ENGINEERING CONTROLS:** Use with adequate ventilation to ensure exposure levels are maintained below the limits provided in Section 2 (Composition and Information on Ingredients). Local exhaust ventilation is preferred, because it prevents dispersion of this gas mixture into the work place by eliminating it at its source. If appropriate, install automatic monitoring equipment to detect the level of oxygen.

**RESPIRATORY PROTECTION:** Maintain airborne contaminant concentrations below exposure limits listed in Section 2 (Composition and Information on Ingredients). Maintain oxygen levels above 19.5% in the workplace. Use supplied air respiratory protection if oxygen levels are below 19.5% or during emergency response to a release of this product. If respiratory protection is required, follow the requirements of the Federal OSHA Respiratory Protection Standard (29 CFR 1910.134), or equivalent State standards.

**EYE PROTECTION:** Splash goggles, face-shields or safety glasses.

**HAND PROTECTION:** Wear mechanically-resistant gloves when handling cylinders of this product.

**BODY PROTECTION:** Use body protection appropriate for task.

**Spic and Span Floor Cleaner  
With Bleach**

## Spic & Span Floor Cleaner with Bleach

**PROCTER & GAMBLE SPIC AND SPAN FLOOR CLEANER WITH BLEACH (non-phosphate & phosphate)**

### **SIGNS & SYMPTOMS OF EXPOSURE**

- **Ingestion:** May cause transient gastrointestinal irritation with nausea, vomiting and/or diarrhea.
- **Eye Contact:** May cause mild, transient irritation with stinging, tearing, itching, swelling and redness
- **Inhalation:** Heavy or prolonged exposure to dust may cause transient respiratory tract irritation with coughing, sore throat, wheezing or transitory shortness of breath.

### **FIRST AID**

- **Emergency Telephone Number: - 1-800-332-7787 or call Local Poison Control Center**
- **Ingestion:** Drink 1 or 2 large glasses of water. If large amounts are ingested, call a physician.
- **Eye Contact:** Flush with large amounts of water for at 10-15 minutes.
- **Skin:** Rinse skin thoroughly with water. Discontinue use.
- **Inhalation:** Leave dusty area.
- **Other:** Product package has a caution statement: **CAUTION:** May cause eye/skin irritation. Eye irritant. Avoid eye contact. Do not mix with other cleaning products as irritating fumes may be released. May be irritating to skin. For sensitive skin or prolonged use, wear gloves. If eye or skin contact occurs, flush with water for 15 minutes. If irritation persists, seek medical attention. **KEEP OUT OF REACH OF CHILDREN**

**PRODUCT MONOGRAM**

**PROCTER & GAMBLE: SPIC AND SPAN FLOOR CLEANER WITH BLEACH (non-phosphate & phosphate)**

**MSDS Safety Information**

The submission of this MSDS may be required by law, but this is not an assertion that the substance is hazardous when used in accordance with proper safety practices and normal handling procedures. Data supplied is for use only in connection with occupational safety and health.

The information contained herein has been compiled from sources considered by Procter & Gamble to be dependable and is accurate to the best of the Company's knowledge. The information relates to the specific material designated herein, and does not relate to the use in combination with any other material or any other process. Procter & Gamble assumed no responsibility for injury to the recipient or third persons, for any damage to any property resulting from misuse of the controlled product.

## Spic and Span Glass Cleaner

### *PROCTER & GAMBLE SPRAY AND GLASS SPIC AND SPAN DISINFECTING ALL PURPOSE CLEANER*

#### **SIGNS & SYMPTOMS OF EXPOSURE**

- **Ingestion:** may cause temporary dizziness, uncoordination and headache.
- **Eye Contact:** Eye contact may result in transient, superficial effects similar to those produced by mild toilet soaps.
- **Skin:** May cause skin irritation. Use on irritated or extremely dry skin may aggravate the existing condition.
- **Inhalation:** N/A

#### **FIRST AID**

- **Emergency Telephone Number:** 24hr P&G Operator - 1-513-983-1100 or call Local Poison Control Center
- **Inhalation:** Remove to fresh air.
- **Ingestion:** Dilute with fluids and treat symptomatically. For large ingestions, call a physician.
- **Eye contact:** Flush thoroughly with water for 15 minutes. Get medical attention if irritation persists.
- **Skin:** Rinse exposed area with soap and water and discontinue use..
- **Other:** Product package has a caution statement: **KEEP OUT OF REACH OF CHILDREN. CAUTION:** Causes eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

## Spray Paint

SHERWIN-WILLIAMS CO: FLUORESCENT SPRAY PAINT, 3106 GREEN

### SIGNS & SYMPTOMS OF EXPOSURE

- HLTH HAZ: OVEREXP TO HEXANE MAY CAUSE DMG TO NERVE TISSUES OF ARMS & LEGS (PERIPHERAL NEUROPATHY), RESULTING IN MUSCULAR WEAK & LOSS OF COORDINATION. THIS EFT MAY BE INCREASED BY PRESENCE OF METHYL ETHYL KETONE.
- PRLNGD OVEREXP TO SOLV INGR EDS LISTED MAY CAUSE ADVERSE EFTS TO LIVER, URINARY, BLOOD-FORMING, (SUPDAT)
- Medical Cond Aggravated By Exposure: NONE GENERALLY RECOGNIZED.

### FIRST AID

- **Emergency Phone Number: 215-566-2917**
- INHAL: IF AFFECTED, REMOVE FROM EXPOSURE. RESTORE BRTHG. KEEP WARM & QUIET.
- SKIN: WASH AFFECTED AREA THOROUGHLY W/ SOAP & WATER. REMOVE CONTAMINATED CLOTHING & LAUNDER BEFORE REUSE.
- EYES: FLUSH EYES W/ LARGE AMOUNTS OF WATER FOR AT LEAST 15 MINUTES. GET MED ATTN.
- INGEST: NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. DO NOT INDUCE VOMITING. GIVE SEVERAL GLASSES OF WATER. SEEK MED ATTN.

**Health Hazards Data**

LD50 Mixture: NONE SPECIFIED BY MANUFACTURER.Route Of Entry Inds - Inhalation: YES Skin: YES Ingestion: NO Carcinogenicity Inds - NTP: NO IARC: NO OSHA: NO Effects of Exposure: IRRIT OF EYES, SKIN & RESP SYS. MAY CAUSE NERVOUS SYS DEPRESS. EXTREME OVEREXP MAY RSLT IN UNCON & POSS DEATH. HDCH, DIZZ, NAUS & LOSS OF COORD ARE INDICATIONS OF EXCESSIVE EXPOS TO VAPORS OR SPRAY MISTS. REDNESS & ITCHING OR BURNING SENSAT ION MAY INDICATE EYE OR EXCESSIVE SKIN EXPOSURE. PRLNGD (EFTS OF OVEREXP) Explanation Of Carcinogenicity: NOT RELEVANT

Signs And Symptoms Of Overexposure: HLTH HAZ: OVEREXP TO HEXANE MAY CAUSE DMG TO NERVE TISSUES OF ARMS & LEGS (PERIPHERAL NEUROPATHY), RESULTING IN MUSCULAR WEAK & LOSS OF COORDINATION. THIS EFT MAY BE INCREASED BY PRESENCE OF METHYL ETHYL KETONE. PRLNGD OVEREXP TO SOLV INGR EDS LISTED MAY CAUSE ADVERSE EFTS TO LIVER, URINARY, BLOOD-FORMING, (SUPDAT) Medical Cond Aggravated By Exposure: NONE GENERALLY RECOGNIZED.First Aid: INHAL: IF AFFECTED, REMOVE FROM EXPOSURE. RESTORE BRTHG. KEEP WARM & QUIET. SKIN: WASH AFFECTED AREA THOROUGHLY W/ SOAP & WATER. REMOVE CONTAMINATED CLOTHING & LAUNDER BEFORE REUSE. EYES: FLUSH EYES W/LARGE AMOUNTS OF WATER FOR AT LEAST 15 M INUTES. GET MED ATTN. INGEST: NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. DO NOT INDUCE VOMITING. GIVE SEVERAL GLASSES OF WATER. SEEK MED ATTN.

**Handling and Disposal**

**Spill Release Procedures:** REMOVE ALL SOURCES OF IGNITION. VENTILATE AND REMOVE WITH INERT ABSORBENT. Neutralizing Agent: NONE SPECIFIED BY MANUFACTURER Waste Disposal Methods: WASTE FROM THIS PROD MAY BE HAZ AS DEFINED UNDER RCRA 40 CFR 261. WASTE MUST BE TESTED FOR IGNITABILITY TO DETERMINE APPLIC EPA HAZ WASTE NUMBERS. DO NOT INCINERATE. DEPRESSURIZE CNTNR. DISPOSE OF I/AW FED, STATE & LOCAL REGS REGARDING POLUTION. Handling And Storage Precautions: CONTENTS ARE EXTREMELY FLAM. KEEP AWAY FROM HEAT, SPKS & OPEN FLAME. VAPS WILL ACCUMULATE READILY & MAY IGNITE EXPLOSIVELY. DURING USE & Other Precautions: INTENTIONAL MISUSE BY DELIB CONC & INHALING CONTENTS CANBE HARMFUL/FATAL. USE ONLY W/ADEQ VENT. AVOID BRTHG VAP & SPRAY MIST. AVOID CONTACT W/SKIN & EYES. WASH HANDS AFTER USING. THESE COATINGS MAY CONTAIN MATLS CLASSIFIED

## Liquid Tide with Bleach

### PROCTER & GAMBLE -- LIQUID TIDE WITH BLEACH ALTERNATIVE

#### SIGNS & SYMPTOMS OF EXPOSURE

- Overexp: EYES: MAY CAUSE STINGING, TEARING, ITCHING, SWELLING, AND/OR REDNESS. SKIN: PROLONGED CONTACT WITH CONCENTRATED MATERIAL MAY BE DRYING OR TRANSIENTLY IRRITATING TO SKIN.
- INGESTION: MAY RESULT IN NAUSEA, VOMITING, AND/OR DIARRHEA.
- Med Cond Aggravated By Exp: NONE SPECIFIED BY MANUFACTURER

#### FIRST AID

- Emerg Ph #: 800-543-0485
- EYES: FLUSH WITH WATER FOR AT LEAST 15 MINUTES.
- INGESTION: GIVE A GLASSFUL OF WATER.
- SKIN: IF PROLONGED CONTACT OCCURS, RINSE THOROUGHLY WITH WATER. IF SPILLED ON CLOTHING, CHANGE CLOTHES. IF SYMPTOMS PERSIST OR REOCCUR, SEEK MEDICAL ATTENTION.
- INHALATION: REMOVE TO FRESH AIR. SUPPORT BREATHING (GIVE OXYGEN OR ARTIFICIAL RESPIRATION), (FP N).
