I could get you listed as a delegate. Usually, however, delegates only get 15 minutes.</p> <p>If you let me know what your needs are I'll see what I can do for you.</p> <p>Regards,</p> <p><i>Clare Kines</i> Community Economic Development Officer</p>

Will continue to keep the MLA informed and request assistance from the MLA on any issues and concerns that CC should be aware of.

Oct 20, 2011	07:45	Jeff Mercer, AAND	e-mail from, to DL re: Hi Denise After reviewing everything and our needs in going to the communities, we have decided that we will only go to Resolute Bay and Grise Fiord thus we will not require a seat on the charter. With respect to the coal licences in process, our primary need is for more information from Grise Fiord as they are the most impacted area. Resolute Bay is also impacted. For our requirements, the new applications are not in the Arctic Bay area. I think it is a good idea the company is going to all three communities as you are looking at it from the point of view of activities at some point while we are looking at it from a licensing perspective at this stage. Also, this will give us additional time ion both the communities separately from the company to speak

			<p>directly to community reps. It is important for us to have an independent process to ensure no concerns of bias are raised.</p> <p>As noted on your schedule, we will be available at 4:00 PM on October 25, 2011. Please come to Building 918 where my office is. I will invite other AANDC applicable representatives.</p>

Oct 31, 2011	07:00	Salamonie Shoo, QIA Lands Administrator	DL met with SS to discuss community consultation tour. Community concerns and queries re: IIBA's were discussed. It was agreed that IIBA's were too early to discuss at this stage. DL mentioned translation concerns and it was agreed that there could be a slight dialect difference between Resolute Bay/Grise Fiord and Arctic Bay due to the relocation. SS also queried by consulting with Arctic Bay since they are so far away from the project site and AB has stated that they would "side" with GF. DL said that this would be considered by CC. SS also offered

			to review the QIA LUP application in draft and would provide any assistance required. In addition, SS mentioned that the QIA Board of Directors would be meeting in May and DL queried if it would be possible for CC to make a presentation to the Board. SS said the Board always welcomes presentations and that he would put this forward.

Feb 8, 2012	11:10	Jeff Mercer,AANDC	<p>e-mail from, to BA re: Hi Braam</p> <p>Attached is our official letter with respect to your application for a Land Use Permit. As noted, a Permit is not required as the noted activities do not exceed the thresholds of Section 9 of the Territorial Land Use Regulations.</p> <p>With respect to coal sampling, please provide us formal notice that the sampling program indicated in your application will still proceed. This will then meet the requirements of your Coal License.</p>

			<p>We will provide a copy of this letter to the Nunavut Impact Review Board for their files. Please feel free to copy the letter to any other parties or agencies you may be dealing with.</p> <p>Please advise if you still want me to call into the conference call.</p> <p>Thank you</p> <p>Jeff G. Feb, 2012		Jeff Mercer: AANDC	<p>E-mail to, from BA re: Dear Jeff,</p> <p>Thank you for your letter.</p> <p>As you are aware, part of our license areas are classified as Inuit Owned Lands and subject to Inuit surface rights.</p> <p>Could you please confirm whether the regulations as set out in your letter applies to both the Crown owned land as well as the permitted areas where the surface rights belong to the Inuit.</p> <p>Best regards</p> <p>Braam Jonker</p>
Feb 8 2012	13:13	Jeff Mercer, AANDC	<p>e-mail from, to BA re: IOL lands are considered privately only lands and they have their own procedures and rules. You are best to talk to them directly as to whether they will require any kind of permit. At a minimum they will require an access agreement for permission to be on their lands.</p>
Feb 9, 2012	06:15	Jeff Mercer, AANDC	<p>e-mail from, to BA re: To conform the Territorial Lands Act and the Territorial Land Use Regulations only apply to Federal Crown Lands administered by our Minister. Thus they do not apply to Inuit Owned lands. However, the Regional Inuit Associations, such as QIA, have their own system of permits and authorizations which may mirror ours. Please contact them directly to determine what they</p>

			<p>may require.</p> <p>With respect to sub-surface rights, such as for Coal, some IOL lands include these rights, some do not. If AANDC administers the sub-surface right but the surface lands are administered by the Inuit, an access agreement will still be required. Some of your Coal Licences are on IOL surface lands. During the issuance process of these licences QIA was consulted and provided all information as to where such licences would be issued. No concerns were raised by them during this process.</p> <p>The net result is that you will need some form of agreement with QIA to access the surface lands to undertake your activities.</p>
Feb 9, 2012	11:22	Keith McCandlish	e-mail from, to JM re: We will have 40,000 litres at the Eureka Weather Station. Does this require permitting.
Feb 9, 2012	09:13	Kieth mc Candlish	<p>e-mail to, from JM re: Hi Keith</p> <p>This could make a difference to this process. Environment Canada only has what is referred to as a Reserve by Notation for their specific activities. They should also have a Water Licence which is based on numbers of people at camp, fuel, etc. As this is a reserve their permission is required for any other use. Please provide us with a copy of your agreement with them to stay at their camp. This should also specifically note the permission to store this amount of fuel there and that this is covered under their water Licence and Spill Containment Plan. Details of how this fuel will be contained, stored and monitored will also be required.</p> <p>Environment Canada does not have a Land Use Permit for</p>

			<p>any activities there. If such an agreement cannot be provided or if Canada Coal prefers, a new application for a Class A LUP will have to be submitted for the fuel, camp, and all activities. This would then be fully screened by NIRB. We will also check their Water Licence to determine if this activity is permitted there. If not you will be required to submit a new application.</p> <p>Please advise how you wish to proceed. I will be available after 2:30 PM today or anytime tomorrow morning</p>

We are currently planning a summer field program for Canada Coal which will include geological mapping, surface sampling, geophysical permafrost investigation, and some environmental reconnaissance work.</p> <p>We would be very interested in hiring some individuals from Grise Fiord to assist with our summer program. We plan to work out of the Eureka Weather station for a period of six weeks, June 15th through July 30th or so.</p> <p>My first question is, do you think there might be anyone in the community who would be interested in working with us for summer field work? Ideally we would like to have several people from Grise Fiord who will act as wildlife monitors and local guides, and perhaps a few assistants?</p> <p>My second question is, do you think we should have a rotation for the field workers? Or would they be interested in working for the full six weeks straight? Any suggestions or opinions that you are able to offer are very much appreciated!</p> <p>I look forward to hearing back from you! If you believe that there may be some interested people in the community, please let me know and I can prepare a job posting. I would then like to collect resumes from anyone interested and we can take it from there.</p> <p>Kind regards,</p> <p>Susan O'Donnell Technical Consultant Canada Coal</p>
