**RE: NWB Licence No. 2BE-FRK0812**

Dear Mr. Hanslit,

Please find attached Licence No. **2BE-FRK0812** issued to Mr. Barry Hanslit by the Nunavut Water Board pursuant to its authority under Article 13 of the *Agreement between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*. The terms and conditions of the attached Licence related to water use and waste disposal are an integral part of this approval.

If the Licensee contemplates the renewal of this Licence, it is the responsibility of the Licensee to apply to the NWB for its renewal. The past performance of the Licensee, new documentation and information, and issues raised during a public hearing, if the NWB is required to hold one, will be used to determine the terms and conditions of the Licence renewal. Note that if the Licence expires before the NWB issues a new one, then water use and waste disposal must cease, or the Licensee will be in contravention of the Nunavut Land Claims Agreement. However, the expiry or cancellation of a licence does not relieve the holder from any obligations imposed by the licence. The NWB recommends that an application for the renewal of this Licence be filed at least three months prior to the Licence expiry date.

If the Licensee contemplates or requires an amendment to this licence, the NWB may decide, in the public interest, to hold a public hearing. The Licensee should submit applications for amendment as soon as possible to give the NWB sufficient time to go through the amendment process. The process and timing may vary depending on the scope of the amendment, however a minimum of 30 days is required from time of acceptance by the NWB. It is the responsibility of the Licensee to ensure that all application materials have been received and acknowledged by the Manager of Licensing.

The NWB strongly recommends that the Licensee consult the comments received by interested persons on issues identified. Comments were received from the Kitikmeot Inuit Association, the

Government of Nunavut Department of Environment, Indian and Northern Affairs Canada and Environment Canada. All comments are attached for your consideration.

Sincerely,

A handwritten signature in dark ink, appearing to read 'T. Kabloona', with a long horizontal flourish extending to the right.

Thomas Kabloona  
A/Chief Executive Officer

## DECISION LICENCE No. 2BE-FRK0812

---

This is the decision of the Nunavut Water Board (NWB) with respect to an application for a Water Licence dated February 6, 2008 made by:

### MR. BARRY HANSLIT

to allow for the use of water and disposal of waste during camp activities and mineral exploration drilling operations at the Fork Property located within the Tree River area of the Kitikmeot Region, Nunavut, with the approximate geographical coordinates:

Latitude: 67°1'9"N    Longitude: 113° 1'50"W

After having been satisfied that the application was for a location within an area in which there is no valid Land Use Plan and exempt from the requirement for screening by the Nunavut Impact Review Board in accordance with Schedule 12.1, Paragraph 5 of the *Nunavut Land Claim Agreement* (NLCA), the NWB decided that the application could proceed through the regulatory process. In accordance with S.55.1 of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* (NWNSTRA) and Article 13 of the NLCA, public notice of the application was given and interested persons were invited to make representations to the NWB.

Written representations were received from the Kitikmeot Inuit Association (KIA), Indian and Northern Affairs Canada (INAC), Environment Canada (EC), and the Government of Nunavut Department of Environment (GN-DoE). In general, representations provided comments and recommendations regarding the Applicant's plans for spill contingency, incineration, abandonment and restoration, and waste management. Specific issues that require special attention in the Water Licence include the following:

1. Incineration of Waste Oil: The Applicant proposed to burn waste oil on site if appropriate. INAC commented that unless burned in an approved incinerator, all waste oils and waste fuels should be removed and back hauled to Yellowknife for disposal. In accordance with INAC's recommendation, Part D Condition 7 of the attached water licence requires the Licensee to backhaul all hazardous wastes including waste oil. If the Licensee wishes to incinerate waste oil, a licence amendment must be filed with the Board demonstrating that waste oil incineration will be conducted in an incinerator designed for those purposes.
2. Spill Contingency Plan: The Applicant provided a spill response plan as part of the application package. INAC, the GN-DoE and EC provided specific recommendations for a revised spill plan that are outlined in Part H, Condition 1 of the attached Water Licence. This condition requires the Licensee to submit a revised Spill Contingency Plan either prior to the start-up of the Project or within thirty (30) days of issuance this Licence, whichever date comes first, taking into account the comments received by interested parties during the review of the application.

After reviewing the submission of the Applicant and representations made by interested persons, the NWB, having given due regard to the facts and circumstances, the merits of the submissions made to it and to the purpose, scope and intent of the *NLCA* and of the *NWNSRTA*, decided to waive the requirement to hold a public hearing and determined that:

**Licence Number 2BE-FRK0812 be issued subject to terms and conditions contained therein.  
(Motion #: 2008-10)**

SIGNED this 11<sup>th</sup> day of May 2008 at Gjoa Haven, NU.

A handwritten signature in dark ink, appearing to read 'T. Kabloona', with a long horizontal flourish extending to the right.

Thomas Kabloona  
A/Chief Executive Officer

**LICENCE NO. 2BE-FRK0812**

Pursuant to the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* and the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*, the Nunavut Water Board, hereinafter referred to as the Board, hereby grants to

**MR. BARRY HANSLIT**

(Licensee)

of

**3380 HAMMOND BAY ROAD  
NANAIMO, BC, V9T 1E6**

(Mailing Address)

hereinafter called the Licensee, the right to alter, divert or otherwise use water and/or dispose of waste for a period subject to restrictions and conditions contained within this Licence:

**2BE-FRK0812**

Licence Number

**NUNAVUT 07**

Water Management Area

**FORK PROPERTY, KITIKMEOT REGION, NUNAVUT**

Location

**WATER USE AND WASTE DISPOSAL**

Purpose

**MINING AND MILLING – TYPE “B”**

Classification of Undertaking

**SIX (6) CUBIC METRES PER DAY**

Quantity of Water Not to Exceed

**MAY 11, 2008**

Date of Licence

**SEPTEMBER 30, 2012**

Expiry Date of Licence

Dated this 11<sup>th</sup> day of May, 2008 at Gjoa Haven, NU.

Thomas Kabloona  
A/Chief Executive Officer

## **PART A: SCOPE, DEFINITIONS AND ENFORCEMENT**

### **1. Scope**

This Licence allows for the use of water and the disposal of waste for an undertaking classified as Mining and Milling as per Schedule II of the *Regulations* for the Fork Property Project, located approximately 130 km southeast of Kugluktuk, 217 km west south west of Bathurst Inlet and 245 km northeast of Port Radium, within the Kitikmeot Region, Nunavut (with the general coordinates of latitude: 67°1'9"N and longitude: 113° 1'50"W).

- i. This Licence is issued subject to the conditions contained herein with respect to the taking of water and the depositing of waste of any type in any waters or in any place under any conditions where such waste or any other waste that results from the deposits of such waste may enter any waters. Whenever new Regulations are made or existing *Regulations* are amended by the Governor in Council under the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*, or other statutes imposing more stringent conditions relating to the quantity or type of waste that may be so deposited or under which any such waste may be so deposited, this Licence shall be deemed, upon promulgation of such Regulations, to be subject to such requirements; and;
- ii. Compliance with the terms and conditions of this Licence does not absolve the Licensee from responsibility for compliance with the requirements of all applicable Federal, Territorial and Municipal legislation.

### **2. Definitions**

**“Act”** means the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

**“Addendum”** means the supplemental text that is added to a full plan or report usually included at the end of the document and is not intended to require a full resubmission of the revised report.

**“Amendment”** means a change to original terms and conditions of this Licence requiring correction, addition or deletion of specific terms and conditions of the Licence; modifications inconsistent with the terms of the set terms and conditions of the Licence;

**“Appurtenant Undertaking”** means an undertaking in relation to which a use of water or a deposit of waste is permitted by a licence issued by the Board;

**“Board”** means the Nunavut Water Board established under the *Nunavut Land Claims Agreement* and the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

**“Engineer”** means a professional engineer registered to practice in Nunavut in

accordance with the Engineering, Geological and Geophysical Act (Nunavut) S.N.W.T. 1998, c.38, s.5;

**“Greywater”** means all liquid wastes from showers, baths, sinks, kitchens and domestic washing facilities, but does not include toilet wastes;

**“Inspector”** means an Inspector designated by the Minister under Section 85 (1) of the Act;

**“Licensee”** means the holder of this Licence;

**“Modification”** means an alteration to a physical work that introduces a new structure or eliminates an existing structure and does not alter the purpose or function of the work, but does not include an expansion;

**“Nunavut Land Claims Agreement”** (NLCA) means the *“Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada”*, including its preamble and schedules, and any amendments to that agreement made pursuant to it;

**“Regulations”** means the *Northwest Territories Water Regulations* sor/93-303 8th June, 1993, omitting Section 5, Water Use or Waste Deposit Without a Licence;

**“Sewage”** means all toilet wastes and greywater;

**“Solid Waste”** means garbage, refuse, or other discarded material resulting from operating the undertaking, excluding sewage sludge, commercial, industrial or hazardous waste.

**“Spill Contingency Plan”** means a Plan developed to deal with unforeseen petroleum and hazardous materials events that may occur during the operations conducted under the Licence;

**“Sump”** means an excavation in impermeable soil for the purpose of catching or storing water or waste;

**“Toilet Wastes”** means all human excreta and associated products, but does not include greywater;

**“Waste”** means, as defined in S.4 of the *Act*, any substance that, by itself or in combination with other substances found in water, would have the effect of altering the quality of any water to which the substance is added to an extent that is detrimental to its use by people or by any animal, fish or plant, or any water that would have that effect because of the quantity or concentration of the substances contained in it or because it has been treated or changed, by heat or other means.

### **3. Enforcement**

- i. Failure to comply with this Licence will be a violation of the *Act*, subjecting the Licensee to the enforcement measures and the penalties provided for in the *Act*;
- ii. All inspection and enforcement services regarding this Licence will be provided by Inspectors appointed under the *Act*;
- iii. For the purpose of enforcing this Licence and with respect to the use of water and deposit or discharge of waste by the Licensee, Inspectors appointed under the *Act*, hold all powers, privileges and protections that are conferred upon them by the *Act* or by other applicable law;

## **PART B: GENERAL CONDITIONS**

1. The water use fees of \$30, payable to the Receiver General for Canada, shall be sent to the Board annually in advance of any use in accordance with Section 9 of the *Regulations*.
2. The Licensee shall file an Annual Report on the appurtenant undertaking with the Board no later than March 31<sup>st</sup> of the year following the calendar year being reported which shall contain the following information:
  - i. A summary report of water use and waste disposal;
  - ii. A summary of drilling activities;
  - iii. A list of unauthorized discharges and a summary of follow-up actions taken;
  - iv. Any revisions to Plans required under Parts H Item 1 and Part I Item 1;
  - v. A description of all progressive and or final reclamation work undertaken, including photographic records of site conditions before, during, and after completion of operations;
  - vi. A summary of all information requested and results of the Monitoring Program;
  - vii. A brief description of follow-up action taken to address concerns detailed in inspection and compliance reports prepared by the Inspector; and
  - viii. Any other details on water use or waste disposal requested by the Board by November 1 of the year being reported.
3. The Licensee shall notify the NWB of any changes in operating plans or conditions

associated with this project at least thirty (30) days prior to any such change.

4. The Licensee shall maintain flow meters or other such devices, or implement suitable methods required for the measuring of water volumes, to be operated and maintained to the satisfaction of an Inspector.
5. The Licensee shall post signs in the appropriate areas to inform the on-site personnel and public of the location of the Sumps.
6. The Licensee shall ensure a copy of this Licence is maintained at the site of operations at all times. Any communication with respect to this Licence shall be made in writing to the attention of:

**(i) Manager of Licensing:**

Nunavut Water Board  
P.O. Box 119  
Gjoa Haven, NU X0B 1J0  
Telephone: (867) 360-6338  
Fax: (867) 360-6369  
Email: [licensing@nunavutwaterboard.org](mailto:licensing@nunavutwaterboard.org)

**(ii) Inspector Contact:**

Water Resources Officer, INAC  
Nunavut District, Nunavut Region  
P.O. Box 100  
Iqaluit, NU X0A 0H0  
Telephone: (867) 975-4295  
Fax: (867) 979-6445

7. The Licensee shall submit one paper copy and one electronic copy of all reports, studies, and plans to the Board. Reports or studies submitted to the Board by the Licensee shall include a detailed executive summary in Inuktitut.
8. The Licensee shall ensure that any document(s) or correspondence submitted by the Licensee to the Board is received and acknowledged by the Manager of Licensing.
9. The Licensee shall, for all Plans submitted under this Licence, include a proposed timetable for implementation. Plans submitted, cannot be undertaken without subsequent written Board approval and direction. The Board may alter or modify a Plan if necessary to achieve the legislative objectives and will notify the Licensee in writing of acceptance, rejection or alteration of the Plan.
10. The Licensee shall, for all Plans submitted under this Licence, implement the Plan as approved by the Board in writing.

11. Every Plan to be carried out pursuant to the terms and conditions of this Licence shall become a part of this Licence, and any additional terms and condition imposed upon approval of a Plan by the Board become part of this Licence. All terms and conditions of the Licence should be contemplated in the development of a Plan where appropriate.
12. This Licence is not assignable except as provided in Section 44 of the *Act*.

**PART C: CONDITIONS APPLYING TO WATER USE**

1. The Licensee shall obtain all water for domestic camp use, up to a maximum of 1 m<sup>3</sup>/day, from the lake west of the camp. Water use for drilling purposes shall be obtained from local water sources(s), proximal to the drilling targets and shall not exceed 5 m<sup>3</sup>/day.
2. Streams cannot be used as a water source unless authorized and approved by the Board.
3. If the Licensee requires water in sufficient volume that the source water body may be drawn down the Licensee shall, at least 30 days prior to commencement of use of water, submit to the Board for approval the following: volume required, hydrological overview of the water body, details of impacts, and proposed mitigation measures.
4. The Licensee shall equip all water intake hoses with a screen of an appropriate mesh size to ensure that fish are not entrained and shall withdraw water at a rate such that fish do not become impinged on the screen.
5. The Licensee shall not remove any material from below the ordinary high water mark of any water body unless authorized.
6. The Licensee shall not cause erosion to the banks of any body of water and shall provide necessary controls to prevent such erosion.
7. Sediment and erosion control measures shall be implemented prior to and maintained during the operation to prevent entry of sediment into water.

**PART D: CONDITIONS APPLYING TO WASTE DISPOSAL**

1. The Licensee shall locate areas designated for waste disposal, a minimum distance of thirty (30) metres from the ordinary high water mark of any water body such that the quality, quantity or flow of water is not impaired, unless otherwise authorized by the Board.
2. The Licensee shall ensure that any chemicals, fuel, or wastes associated with the appurtenant undertaking do not enter waters.

3. The Licensee shall not practice open burning or on site land filling of domestic waste, unless otherwise approved by the Board.
4. The Licensee is authorized to dispose of non-hazardous combustible waste, including food waste, paper waste and untreated wood products in an incinerator. All other solid wastes shall be backhauled to an approved waste disposal facility.
5. The Licensee shall provide to the Board, documented authorization from the relevant community prior to the backhauling of any waste.
6. The Licensee shall backhaul and dispose of all hazardous wastes including waste oil, used drums and propane tanks generated through the course of the operation, in an approved waste disposal site.
7. The Licensee shall maintain records of all waste backhauled and records of confirmation of proper disposal of backhauled waste. These records shall be made available to an Inspector upon request.
8. The Licensee shall contain all greywater in a sump located at a distance of at least thirty (30) metres above the ordinary high water mark of any water body, at a site where direct flow into a water body is not possible and no additional impacts are created, unless otherwise approved by the Board in writing
9. The Licensee shall contain all toilet wastes in latrine pits or use incineration, chemical, portable or composting toilets. Latrine pits shall be located at a distance of at least thirty (30) metres above the ordinary high water mark of any water body, at a site where flow into a water body is not possible and no additional impacts are created. Prior to abandonment, pits are to be treated with lime and covered with native material to achieve the pre-existing natural contours of the land.
10. The Licensee shall discharge waste in such a manner to minimize surface erosion.

**PART E: CONDITIONS FOR CAMPS, ACCESS INFRASTRUCTURES AND OPERATIONS**

1. The Licensee shall not erect camps or store material on the surface of frozen streams or lakes including immediate banks except what is for immediate use. Camps shall be located such as to minimize impacts on surface drainage.
2. All activities shall be conducted in such a way as to minimize impacts on surface drainage and the Licensee shall immediately undertake any corrective measures in the event of any impacts on surface drainage.
3. Winter lake and stream crossings, including ice bridges, shall be constructed entirely of

water, ice or snow. The Licensee should minimize disturbance by locating ice bridges in an area that requires the minimum approach grading and the shortest crossing route. Stream crossings shall be removed or the ice notched prior to spring break-up.

4. With respect to access road, pad construction or other earthworks, the deposition of debris or sediment into or onto any water body is prohibited. These materials shall be disposed a distance of at least thirty (30) metres from the ordinary high water mark in such a fashion that they do not enter the water.

#### **PART F: CONDITIONS APPLYING TO DRILLING OPERATIONS**

1. The Licensee shall not conduct any land based drilling within thirty (30) metres of the ordinary high water mark of any water body, unless otherwise approved by the Board.
2. The Licensee shall ensure that all drill waste, including water, chips, muds and salts ( $\text{CaCl}_2$ ) in any quantity or concentration shall be disposed of in a properly constructed sump or an appropriate natural depression located at a distance of at least thirty (30) metres from the ordinary high water mark of any adjacent water body, where direct flow into a water body is not possible and no additional impacts are created.
3. If artesian flow is encountered, drill holes shall be immediately sealed and permanently capped to prevent induced contamination of groundwater or salinization of surface waters. The Licensee shall report all artesian flow occurrences within the Annual Report, including the location (GPS coordinates) and dates.
4. Where drilling activity has penetrated below the permafrost layer, the NWB requests that the proponent record the depth of permafrost and location of the drill hole to be included within the Annual Report.
5. On-ice drilling is not authorized under this Licence.

#### **PART G: CONDITIONS APPLYING TO MODIFICATIONS**

1. The Licensee may, without written consent from the Board, carry out Modifications to the Water Supply Facilities and Waste Disposal Facilities provided that such Modifications are consistent with the terms of this Licence and the following requirements are met:
  - i. the Licensee has notified the Board in writing of such proposed Modifications at least sixty (60) days prior to beginning the Modifications;
  - ii. such Modifications do not place the Licensee in contravention of the Licence or the *Act*;

- iii. the Board has not, during the sixty (60) days following notification of the proposed Modifications, informed the Licensee that review of the proposal will require more than sixty (60) days; and
  - iv. the Board has not rejected the proposed Modifications.
- 2. Modifications for which all of the conditions referred to in Part G, Item 1 have not been met can be carried out only with written approval from the Board.
  - 3. The Licensee shall provide as-built plans and drawings of the Modifications referred to in this Licence within ninety (90) days of completion of the Modification. These plans and drawings shall be stamped by an Engineer.

**PART H: CONDITIONS APPLYING TO SPILL CONTINGENCY PLANNING**

- 1. Either prior to the start-up of the Project or within thirty (30) days of issuance this Licence, whichever date comes first, the Licensee shall submit, a revised Spill Contingency Plan prepared in accordance with the *Spill Contingency Planning and Reporting Regulations* developed under Section 34 of the *Environmental Protection Act*. The Licensee shall update the Plan by referring to, but not limited by, the comments received by interested parties during the review of the application.
  - a. The following contact information;
    - i. Peter Kusugak, Manager  
Tel: (867) 975-4295  
Fax: (867) 979-6445  
Email: [KusugakP@inac-ainc.gc.ca](mailto:KusugakP@inac-ainc.gc.ca)
    - ii. Melissa Joy, Water Resources Officer  
Tel: (867) 982-4302  
Fax: (867) 982-4307  
Email: [JoyM@inac-ainc.gc.ca](mailto:JoyM@inac-ainc.gc.ca)
    - iii. Baba Pederson, Resource Management Officer  
Tel: (867) 982-4306  
Fax: (867) 982-4307  
Email: [PedersonB@inac-ainc.gc.ca](mailto:PedersonB@inac-ainc.gc.ca)
  - b. Spill prevention measures;
  - c. Material Safety Data Sheets;
  - d. An on-site contact number (SAT number) in the event of a spill;
  - e. A complete list of items which are included in the spill kits;
  - f. Details of fuel and chemical storage; and
  - g. Detailed description of clean-up techniques in the event of a spill.

2. In the event of a spill occurring on land, the Licensee shall immediately remove the contaminated soil and place it in drums for backhauling to an approved waste disposal facility.
3. The Licensee shall ensure that any chemicals, petroleum products or wastes associated with the project do not enter water. All sumps and fuel caches shall be located at a distance of at least thirty (30) metres from the ordinary high water mark of any adjacent water body, preferably in an area of low permeability, and inspected on a regular basis. The Licensee shall provide secondary containment for fuel storage areas.
4. The Licensee shall ensure that any equipment maintenance and servicing be conducted only in designated areas and shall implement special procedures (such as the use of drip pans) to manage motor fluids and other waste and contain potential spills.
5. The Licensee shall regularly inspect fuel tanks and connectors for leaks and movement and shall keep a written log of inspections to be made available to an Inspector upon request.
6. If during the term of this Licence, an unauthorized discharge of waste occurs, or if such a discharge is foreseeable, the Licensee shall:
  - i. Employ the Spill Contingency Plan;
  - ii. Report the spill immediately to the 24-Hour Spill Line at (867) 920-8130 and to the Inspector at (867) 975-4295; and
  - iii. For each spill occurrence, submit to the Inspector, no later than thirty (30) days after initially reporting the event, a detailed report that will include the amount and type of spilled product, the GPS location of the spill, and the measures taken to contain and clean up the spill site.

**PART I: CONDITIONS APPLYING TO ABANDONMENT AND RESTORATION OR TEMPORARY CLOSING**

1. The Licensee shall submit to the Board for approval, within sixty (60) days of issuance of this Licence, a stand-alone Abandonment and Reclamation Plan that is specific to the scope of this Licence and prepared in accordance with the *Mine Site Reclamation Guidelines for the Northwest Territories* (INAC) 2006 and consistent with the *INAC Mine Site Reclamation Policy for Nunavut*, 2002. The Licensee shall refer to comments submitted by interested parties as part of the review of the Plan. The Plan shall address reclamation of contaminated soils, including soil quality remediation objectives as per the Government of Nunavut's *Environmental Guideline for Site Remediation* (2002).
2. The Licensee shall complete all restoration work prior to the expiry of this Licence.

3. The Licensee shall carry out progressive reclamation of any components of the project no longer required for the Licensee's operations.
4. At the end of each field season, the Licensee shall backfill and restore, to the satisfaction of an Inspector, all Sumps to the pre-existing natural contours of the land. Sewage and Greywater Sumps shall be treated with lime before being filled.
5. The Licensee shall remove from the site infrastructures and site material, including but not limited to, all fuel caches, drums, barrels, buildings and contents, docks, water pumps and lines, material and equipment before the expiry of this Licence.
6. In order to promote growth of vegetation and the needed microclimate for seed deposition, all disturbed surfaces shall be prepared by ripping, grading, or scarifying the surface to conform to the natural topography.
7. Areas that have been contaminated by hydrocarbons from normal fuel transfer procedures shall be reclaimed to the satisfaction of an Inspector. The use of reclaimed soils for the purpose of back fill or general site grading may be carried out only upon approval by an Inspector.
8. Drill holes and disturbed areas will be restored to natural conditions immediately upon completion of the drilling. The reclamation of drill holes must include the removal of any drill casing materials and the capping of holes with a permanent seal.
9. The Licensee may store drill core produced by the appurtenant undertaking in an appropriate manner and location at least thirty (30) metres above the ordinary high water mark of any adjacent water body, where any direct flow into a water body is not possible and no additional impacts are created, or as directed by an Inspector.
10. All disturbed areas shall be contoured and stabilized upon completion of work and restored to a pre-disturbed state.

**PART J: CONDITIONS APPLYING TO THE MONITORING PROGRAM**

1. The Licensee shall measure and record, in cubic meters, the daily quantities of water utilized for camp, drilling, and other purposes.
2. The Licensee shall provide the GPS coordinates (in degrees, minutes, and seconds of latitude and longitude) of all locations where sources of water are utilized for all purposes.
3. The Licensee shall provide the GPS coordinates (in degrees, minutes, and seconds of latitude and longitude) of all locations where waste associated with camp operations and drilling operations are deposited.

4. An Inspector may impose additional monitoring requirements.
5. The Licensee shall, include in the Annual Report required under Part B, Item 2, all monitoring data and analysis and information required by this Part.
