rpriters-translat

Further to my previous emails there is a requirement to submit a project summary in english and Inuktitut as well as an abandonment and restoration plan, a spill contingency plan, and a uranium exploration plan. It is my understanding that the amendment is to add drilling to the current license as well as to increase the amount of water required. Am I correct? Your current license authorizes you to use 5 m3/day. What would be the total m3/d required through this amendment? Your file will go out for a 30 day period of review once we have received all the necessary documentation. I have attached a list of translators for your use.

Regards,

---
